

ADMINISTRATION AT LAST INQUIRES INTO MURDER OF U.S. INFANTRYMAN

Demands of Huerta Government News of the Fate of Private Parks

"AN UNFRIENDLY ACT"

Unless Information Is Given the Execution Will Be Considered "Unfriendly and Hostile"

U. S. NOTE ASKS BRAZILIAN MINISTER TO PROTEST

WASHINGTON, May 15.—The United States today demanded of the Huerta government news of the fate of Private Parks, the American infantryman who strayed into Mexican lines near Vera Cruz, declaring that unless information about him was given immediately the American government would consider that "an unfriendly and hostile act" had been committed in violation of the understanding for a cessation of hostilities pending mediation.

President Wilson and Secretary Bryan, it was learned tonight, drafted a strong communication after receiving word from the Brazilian minister in Mexico that Parks had been "executed." No mention was made in the minister's report of whether he was shot as a spy after a court martial, or whether his body was burned as has been reported persistently to General Funston. The American government cabled the Brazilian minister to inform the Huerta government of the strong feeling of the United States in the matter, directing him to make vigorous representations concerning the incident.

The note asked the minister to protest to the Huerta government that if Parks were alive, the failure to explain his whereabouts was in itself an unfriendly attitude and that if the soldier has been executed, as has been reported, such execution of a man who came into the Mexican lines in full uniform was contrary to military procedure of civilized nations and an act of hostility.

No mention was made in the American note of the course the United States intends to pursue in the matter but an official close to the president said tonight it was one of the things but would be held up against the Huerta government when the final reckoning came over offenses committed against the United States.

The three South American mediators had received no communication from the United States about the Parks incident and persons in the confidence of the president said the affair probably would not interfere with the beginning of the mediation proceedings. The receipt of word by the British embassy from Sir Lionel Carden, British minister in Mexico City that Consul Silliman was on his way by rail from Sankito to Mexico City, brought first news about Silliman in several days, considerably relieving the anxiety that had been felt by officials.

Conference Postponed.

Washington, May 15.—Postponement of the Niagara Falls Mexican mediation conference from next Monday to the following Wednesday at the request of the Huerta delegates, changed the plans of the South American mediators and the commissioners for departure today and tomorrow and produced at the same time much speculation as to possible significance in the delay. Later the Spanish ambassador here, who is caring for the interest of Mexico in the United States, authorized the statement that the two day delay meant merely that the Huerta delegates wanted a brief respite from their long journey and had no political importance. The Spanish ambassador will give the Mexicans a dinner here on Saturday night, after which they will proceed to Niagara Falls. There were many developments in the day clearing the horizon for mediation but one sinister aspect developed in the sending a strong note of protest by the United States government to General Huerta through the Brazilian minister in Mexico City declaring the reported execution of Private Parks, an American infantryman, a hostile act in view of the suspension of hostilities at Vera Cruz. While there is no intimation as to what the course of the United States would be it is practically certain that when the final reckoning is made for offenses alleged to have been committed by the Huerta administration the Parks' incident will have a prominent part.

The three mediators through the state department today announced that the Lobos Island incident had been cleared up. They did not say what word had been received from General Huerta, but they have informed him that the Mexicans were free to return to the Lobos Island light house whenever they chose, provided they maintained it for the

world's navigation. The mediators say it is a closed incident.

An announcement was made at the state department that the five alleged South American snipers upon arrest at Vera Cruz for firing upon Americans had turned out to be Mexicans and like the others arrested at Vera Cruz on this charge had been discharged. On the whole President Wilson and his cabinet took a more hopeful view of the Mexican situation than they had in many weeks. They are confident that mediation will accomplish something toward the pacific settlement of the Mexican problem. The capture of Tampico by the constitutionalists brought out the fact that at present there is now prohibition against the shipment of arms into that port from the United States or any other country. Secretary Garrison today revealed the nature of his recent order shutting off shipments of arms across the international border. He said it was a departmental order and did not affect shipment through seaport towns.

MASKED MEN HOLD-UP GREAT NORTHERN "ORIENTAL LIMITED"

Combination Mail and Baggage Car Is Detached from Train and Ripped Bandits Obtain Little Loot.

Spokane, Wash., May 15.—Great Northern railroad train No. 1, the Oriental Limited, was held up by two masked men early today near Rexford, Montana. The combination mail and baggage car was detached from the train and run four miles west to Rondo, where they car was rifled. Little valuable loot was obtained by the bandits as the registered pouches had been brought west ten hours earlier by the fast mail. As soon as the train was stopped the mail clerk and baggage men locked the doors and jumped from the train and hid in the bushes along side the track. When the bandits could not open the car doors they dynamited them and put many bullets into the car. The train arrived here without the damaged car three hours late.

INSURGENTS MAY ASK FEDERAL INJUNCTION WRIT AGAINST OFFICERS

If Credentials Are Not Issued to Delegates Elected to Convention by State Gatherings Controlled by M. W. A. Insurgents Action Will be Taken.

Aurora, Ill., May 15.—A federal court writ of injunction preventing the holding of the tri-annual convention of the Modern Woodmen of America on June 16th, at Toledo, Ohio, will be asked, it was announced today, if the officers of the insurance order do not issue credentials to delegates elected at recent state conventions controlled by insurgents. The national officers of the Woodmen have refused to issue credentials to Illinois insurgent delegates, according to Judge M. H. Clardy of Galena, Ill., and Attorney T. E. Ryan of St. Charles, Ill., members of the insurgent committee. They met at St. Charles yesterday and decided that an injunction of the convention was the only step for the insurgents to take in the event their delegates are not recognized.

OPERATE CORRESPONDENCE SCHOOL FOR CRIME.

Chicago, May 15.—George B. Patee and Daniel McNeel, believed to be originators of a correspondence school for teaching crime, today were held to the federal grand jury by United States commissioner Mason after he had read a pamphlet instructing law breakers how to elude the authorities. Secret service men found a number of plates for correspondence in the room occupied by the men. They also produced human hair, used in making spurious bank notes, which they believe was cut from the head of a woman confederate.

WILL WORK IN HARMONY.

New York, May 15.—Articles of alliance have been adopted by the amateur unions of the United States and Canada, it was announced here tonight by James E. Sullivan, secretary-treasurer of the American body and under them the two organizations will work in harmony.

ISSUES BANK PERMIT

Springfield, Ill., May 15.—Auditor of Public Accounts Brady today issued a permit to Andrew H. Dressel, Stephen W. Brundage, I. E. Pearman, John F. Gibbons, William N. Cottrell and Max Eberhart to organize the Dressel State Bank at Chicago with a capital of \$250,000.

SOUTHERN HERO BURIED.

Gretna, La., May 15.—Louis Oscar Fried, the first southerner to fall while American soldiers occupied Vera Cruz, was buried here today with military honors. A monument, paid for by popular subscription, will be erected over his grave.

LEAVE FOR CAMBRIDGE.

Berkeley, Cal., May 15.—The University of California track team of ten men left Berkeley today to compete in the big college conference meet at Harvard on May 20th.

MILITARY AVIATOR KILLED.

Sebastopol, Russia, May 15.—The military aviator Semichukoff fell from an aeroplane during a flight today and was killed.

STATE BOARD OF AGRICULTURE ISSUES CROP BULLETIN FRIDAY

Bulletin Shows 1,129,273 Acres of Winter Wheat for Harvest—Livestock Reported Healthy and Prospects Favorable for Abundant Yield of Fruit.

Springfield, Ill., May 15.—The crop bulletin issued today by the state board of agriculture shows 1,129,273 acres of winter wheat for harvest. Condition on May 1 was excellent being 94 per cent of normal in northern Illinois and 101 per cent in central and southern Illinois.

The average of 99 per cent in the state is seven points higher than the condition on May 1st last year.

May 1st, condition of spring wheat is reported 99 per cent of normal; winter rye 98 per cent of normal; in northern Illinois 99 per cent in central Illinois and 99 per cent in southern Illinois.

Oats 90 per cent of normal in state.

Meadows, May 1st, 88 per cent in northern Illinois, 91 per cent in central Illinois and 95 per cent in southern Illinois.

Pastures are reported 88 per cent of normal in northern, 92 per cent in central and 95 per cent in southern Illinois.

Livestock is reported healthy. Fruit prospect, May 1st, was favorable for abundant yield, with the exception of apples.

CORNING NATIONAL BANK FAILS TO OPEN DOORS

Comptroller of Currency Orders Institution Closed Following Thursday's Run When \$50,000 Is Withdrawn.

Corning, Iowa, May 15.—The First National bank of Corning, failed to open its doors today following a run yesterday when about \$50,000 in deposits was withdrawn. The institution was closed on the order of the comptroller of the currency and W. W. Smith of St. Louis, a bank examiner is in charge. R. R. Newcomb is the president and B. Newcomb is the cashier. The latter said today that all claims would be paid. The capital stock of the bank was \$100,000, with deposits at \$220,000.

Resources not counting capital stock were placed at \$250,000 in the last report. Most of the stock was owned by the Newcomb family.

The presence of the bank examiner here for more than a week is believed to have given rise to the rumor that the concern was not in good condition and yesterday's run was the result. Cashier Newcomb was positive in the state that the bank's resources were ample.

"The run started yesterday and we were unable to get more funds into Corning in time to check it," he said. "We paid out all the money we had on hand."

FOLK EXAMINES DOCUMENTS.

Washington, May 15.—While former President Charles S. Melton of the New York, New Haven & Hartford railroad was on his way late today, to his home in Connecticut to obtain additional papers wanted in connection with his testimony at the inquiry into the New Haven's affairs, chief counsel Folk of the inter-state commerce commission directing the inquiry, was examining documents Mr. Melton already had submitted. This work will continue tomorrow.

ORDERED TO MEXICO.

Miss Emma Cook of 1011 South East street, has received word that her uncle, Lieut. Leonard H. Cook of the 6th regiment U. S. infantry, stationed at Presidio, California, had been ordered to the Mexican border at El Paso and had left on the 24th of April on twenty-four hours notice. Lieut. Cook is a brother of James A. Cook, father of Miss Emma Cook. He returned last July from service in the Philippine islands.

IN DANGER OF ASPHYXIATION.

Chicago, May 15.—Fourteen persons engaged in an inquest over the body of Oscar P. Ayers, who died of gas asphyxiation, were in danger of being overcome themselves here today. Escape of gas from a fixture in the undertaking room was unnoted for some time because of the heavy odor of embalming fluid, until a policeman found that not only himself but others were growing suspiciously sleepy.

BANKERS ARE ARRESTED.

Eldora, Iowa, May 15.—Henry D. Hemmell, president; John E. Hemmell, cashier of the Farmers' Bank at Radcliffe, were arrested here today charged with forgery. The Farmers' bank, a private institution closed its doors yesterday.

CONFERENCE ADJOURNS.

Memphis, Tenn., May 15.—The forty first annual session of the national conference of churches and corrections which convened here on May 8th, adjourned late today. The next meeting will be held in Baltimore.

DRAKE DEFEATS IOWA STATE.

Ames, Iowa, May 15.—Drake athletes defeated the Iowa State College men in a well contested meet here today, winning by 69 to 58.

STANDING OF WARD SCHOOLS IN BASEBALL.

In the Ward School League, Washington, Lafayette and Franklin have each won two games and lost one, forming a triple tie for first place. If Jefferson beats Washington today, Lafayette and Franklin will play for the championship. If Washington wins there will be a triple tie.

RESOLUTION ASKING RESIGNATION DEFEATED

COLORADO SENATORS DEFEAT BILL ASKING GOV. AMMONS TO RESIGN

Report of Third Conference Committee on Military Bond Issue Bill Is Adopted—Strikers Still Refuse to Offer Any Evidence at Court Martial in Denver.

DENVER, Colo., May 15.—The senate today defeated a resolution asking Governor Ammons to resign. Conference committee on the million dollar bond issue bill to pay militia expenses and on the bill authorizing the governor to close saloons reported disagreements and second conference committees were named.

The house and senate today adopted the report of the third conference committee on the military bond issue bill. It carries the emergency clause, which guarantees it going into immediate effect. The measure provides for a million dollar bond issue to pay expenses of the state guard "that have been and may be incurred."

The matter of determining whether the pay of corporations who are listed in the militia shall also receive military pay is left to this board having charge of the expenditures. Late today the joint session adopted a memorial addressed to President Wilson, requesting him to intervene further in the strike situation by such methods as he considers best and asking that the troops be retained in the strike zone until a settlement of the trouble has been effected.

Were Running From Military Lines.

Denver, Colo., May 15.—The three Ludlow strikers killed on the night of April 20th, were shot while running from the military lines toward the burning tent colony directly in the line of fire between the militia and strikers, according to the testimony of militiamen today at the trial of Major Patrick H. Hamrock, before the general court martial.

The strikers had been taken prisoners, the witness said and tried to escape when the soldiers sought cover under fire.

The strikers again have refused to offer any evidence at the court martial.

Busy Adjusting Cases.

Trinidad, Colo., May 15.—Col. James Lockett, commander of the federal forces in this district of Colorado, spent the day adjusting cases growing out of the order barring imported miners. Eight men were allowed to work at the Oakdale mine and sixteen were barred.

At the Primero mine one of five was allowed to work.

Sub-Committee Adjourns.

Charleston, W. Va., May 15.—The sub-committee of operators and miners appointed to arrange a wage scale in the Kanawha coal field, adjourned tonight until May 25th.

Five More Arrests Made.

Boulder, Colo., May 15.—Five more arrests were made here late today in connection with the fourteen indictments returned on Wednesday by the grand jury growing out of the assault of the Hecla mine at Louisville on April 28th, by striking miners. Those arrested are John O'Connor, president of the Louisville local of the United Mine Workers of America; Ike Robbins, Tony Romeo, Joe Bordinelli, all charged with first degree murder, and Joe Potestio, charged with assault with intent to murder.

Bond Arrangements Made.

Denver, Colo., May 15.—Announcement was made at the district headquarters of the United Mine Workers here late today that arrangements had been made for \$2,000 bond each for the men charged with murder in first degree in indictments returned by the Boulder county grand jury and that bonds aggregating \$68,000 for 56 other persons on charges of conspiracy to murder and conspiracy to attempt to murder had been arranged.

CATTLE QUEEN DEAD.

Salt Lake City, Utah, May 15.—Mrs. Elizabeth Bonemort, known throughout western Utah, died at her home here today. Mrs. Bonemort came to Utah from Scotland in 1865 at the age of 20 years and immediately engaged in the cattle and sheep business with great success.

BIG FIRE AT GALVESTON.

Galveston, Texas, May 16.—Fire in the warehouse of the Merchants and Planters' Company here early this morning was placed under control at 1:30 o'clock causing a loss of \$900,000 to the building and contents. Eleven thousand bales of cotton were stored in the structure.

THOMAS WATSON INDICTED.

Atlanta, Ga., May 15.—Thomas Watson, formerly representative in congress and once a candidate for president of the United States on the Populist ticket, was indicted here today on a charge of sending obscene matter through the mails.

VESEUVIUS AGAIN ACTIVE.

Naples, May 15.—Mount Vesuvius again is active. Tonight a high column of vapor and tongues of flame are coming out of the crater.

FIGHT TO ROUND DRAW.

Kansas City, May 15.—"Bob" Mohr of Milwaukee and Al Norton of California, heavyweights, fought ten rounds to a draw here tonight.

STATE M. W. A. DELEGATES MADE REPORTS FRIDAY NIGHT

T. J. Bronson and Charles F. Glossop Made Clear That Insurgents Were in Control at Rock Island Meeting—Both Will Go to the Head Camp at Toledo.

At a meeting of Camp 132, Modern Woodmen, held Friday night T. J. Bronson and Charles F. Glossop made reports of the state camp held recently at Rock Island. At that convention Mr. Bronson was elected a delegate to the head camp which will be held in Toledo in June and it has been decided by the camp here to send Mr. Glossop as his assistant. Matters of such great moment will be settled at this session of the head camp that it was deemed advisable to send Mr. Glossop along with Mr. Bronson.

The reports by the two delegates to the state camp made it clear that the insurgents controlled the convention. Newspaper reports sent out with reference to the proceedings were somewhat in conflict and the casual reader was left in some doubt as to the real conditions. There were 334 delegates in the convention and of this number 254 were classed as insurgents and 80 as regular, or standpoint delegates. When the roll call showed the number of insurgents, the regulars, all of whom except two, were from Cook county, withdrew and held a rump convention and elected 73 delegates to the head camp, all of them from Cook county. The insurgents elected their 73 delegates from all parts of the state.

According to the report made the regulars, or head camp supporters, had holding delegations from various parts of the state and expected to have such control of the credentials committee at the state camp that they would be able to seat all of their delegates. Despite all their efforts to win over enough insurgents to give them control, they were unable to make any inroads upon the insurgent ranks. The first vote taken on any question showed an insurgent strength of 254 and this exact number was maintained on every question relating to the insurgent and standpoint movement. This inability to break the insurgent ranks made it impossible to get control of the credentials committee and so the bolting delegates arranged for in various parts of the state came to naught.

The insurgents had a number of lawyers to advise them, as well as other men, very familiar with Woodmen and insurance affairs, and every act was taken advantage of and without any disturbance or uproar. There seems to be little doubt that the election of the 73 state insurgent delegates to the head camp will be sufficient to throw the control of the number of delegates in the head camp will be 436. Next to the Illinois delegation the largest will be from Iowa, that state being accredited with 35. Missouri will have 34 delegates and Kansas 28. All other states will have lesser numbers, many of them being entitled only to 1 each. These figures indicate what a strong factor Illinois will be in reaching a final settlement on the question of increasing the insurance rates.

AMERICAN GOLFERS OUTCLASSED BY SCOTCH AND ENGLISH PLAYERS

John Graham Jr., Scotland Wins the St. George's Champion Grand Challenge Cup for Second Time.

Sandwich, England, May 15.—American golfers today were outclassed by Scotch and English players in the final round for the St. George's champion grand challenge cup.

With an aggregate of 146 strokes, nine better than his nearest American competitor Jerome D. Travers, the American amateur champion, John Graham Jr., Scotland, today for the second time won the coveted trophy. In doing so Graham also lowered by two strokes the play for the cup.

Travers turned in a card of 155 for the 36 holes. Francis Quimet, the American open champion, required 158 strokes to cover the course. Charles W. Evans, Chicago, 159; Weber Hale, Chicago, 166; Harold Frazer, Toledo, 167 and C. N. Insley, New York, 169.

MAKES LONG FLIGHT.

Stockholm, May 15.—The Swedish Aviator Thulin, today flew from Malmoe to Stockholm, a distance of 267 miles, without descending, in four hours and twenty minutes.

THREE EYE LEAGUE.

Springfield 4; Dubuque 0.
Decatur 15; Peoria 5.
Davenport 3; Quincy 0.

PRELIMINARY ARRANGEMENTS FOR MEMORIAL CELEBRATION

G. A. R. and Woman's Relief Corps Are Perfecting Plans for Occasion—Bishop Samuel Fallows May Be Speaker.

Memorial day exercises for May 30, Saturday, are being planned by members of the G. A. R., and the Woman's Relief Corps. Last year the mayor and city commissioners gave some valuable assistance in arranging for the day and the committee is expecting help from them again.

Major C. E. McDougall is chairman of the executive committee, which is composed of C. Riggs Taylor, L. R. Penfield, George Faul and Benjamin Wood.

It is expected to have as speaker of the day, Bishop Samuel Fallows of Chicago and a program of special appropriateness is being arranged. These exercises will be held in Centenary M. E. church. The services of the Jeffries band will be secured and following the exercises the graves of the soldiers at the various cemeteries will be decorated.

On Sunday, May 24, the memorial sermon will be preached at Centenary M. E. church by the pastor, Rev. G. W. Flagg. There will also be special music for this occasion. The program committee expects to be able to announce a full program in a few days.

COMMITTEES ARE NAMED FOR CHAUTAUQUA WORK

Preliminary Arrangements Being Made For Annual Jacksonville Festival.

At a recent meeting of the president and secretary of the Jacksonville chautauqua appointed the chairmen to the different committees. These chairmen have announced their list of helpers as follows:

Executive and program committee—Dr. C. E. Black, chairman; Dr. J. R. Harker, Dr. C. H. Rammelkamp, John Merrigan, C. R. Knollenberg, Bernard Gause, Frank J. Heil, Dr. Josephine Milligan, A. C. Rice.

Advertisement—John Merrigan, chairman; Fletcher Hopper, C. S. Hillberry, Paul Fritchey, Henry Frisch.

Woman's Auxiliary—Mrs. U. G. Woodman, chairman; Mrs. T. H. Buckthorpe, Mrs. William Newman, Mrs. J. J. Reeve, Mrs. Charles Fawcett, Mrs. James Strawn, Mrs. Geo. Harney, Dr. Josephine Milligan.

Finance—Dr. Carl E. Black, chairman; Bernard Gause, C. R. Knollenberg, A. C. Rice, F. J. Heil.

Transportation—J. W. Elliott, chairman; W. W. Gillham, John Cherry, U. G. Woodman.

Tickets—C. R. Knollenberg, chairman; G. H. Kopper, R. C. Reynolds, W. T. Brown, Carl Weber.

Grounds and tents—Bernard Gause, chairman; J. E. Osborne, Charles S. Black, A. A. Curry, J. J. Jackson, S. W. Baxter, C. A. Boruff, T. L. Dunlap, John Sheppard, T. S. Martin, U. G. Woodman, J. B. Beckman.

Sunday school—A. A. Curry, chairman. He is to appoint others on this committee.

CLOVER LEAF PASSENGER TRAIN BRINGS DEATH TO THREE AUTOISTS

John Meier of This City Brother of Victims in Accident Friday in Madison County—Were on Way to This City for Visit.

Instant death and mutilation so terrible that the victims could not be recognized was the fate of Mr. and Mrs. J. F. Stuckwisch and Oscar Meier of Marine, Ill., near Edwardsville, autoists on their way to Jacksonville Friday morning, when their car was hit by a Clover Leaf passenger train near Kaufman, Madison county. Mrs. Stuckwisch and Mrs. Meier are sister and brother of John H. Meier of this city, a blacksmith in the employ of F. C. McDougall, residing at 334 South Mauvalster street.

Mr. Meier received a telegram with news of the accident Friday afternoon and left in the evening for Edwardsville via Springfield. The party were coming to Jacksonville to visit their mother, Mrs. Amanda Meier, who is a patient at a local hospital.

The accident occurred at a point where the railroad crosses a wagon road at a sharp angle and where approaching trains are consequently hardly visible to see the engineer of the train did not see the auto until the engine had struck it and set crushed machine and occupants at making identification. The automobile was the property of Mr. Stuckwisch bookkeeper for the Vallee Spies Milling Co., of Marine.

EXPLOSION KILLS TEN.

Detroit, Mich., May 15.—Ten men, most of them chemists were killed by the explosion of acid and chemicals in the mixing room of the Mexican Crude Rubber company here today. Four other employees removed from the steaming debris were taken to a hospital and all may die. Two men were less seriously hurt. Two buildings a one story structure of concrete and cement, was almost obliterated.

Other buildings within a radius of a mile were more or less damaged. The loss was estimated at \$50,000.

HAD BIRTHDAY SURPRISE.

William J. Sawyer of East Dunlap street was given a surprise party Tuesday by a number of friends in celebration of his 27th birthday. Delicious refreshments were served and a pleasant time socially enjoyed by all until a late hour.

OBJECTIONS DELAY FINAL ACTION ON BILL

ACTION ON AGRICULTURAL APPROPRIATION BILL DELAYED IN SENATE

Appropriation of \$50,000 For Study of Co-operation Among Farmers in Matters of Rural Credits and Sanitation is Chief Object of Attack—Other Washington News.

WASHINGTON, May 15.—Final action on the agricultural appropriation bill was delayed in the senate again today by continued objections to various items in the measure. An appropriation of \$50,000 for the study of co-operation among farmers in matters of rural credits and sanitation was the chief object of attack. Senator Martin chairman of the appropriations committee said this expenditure would be useless and that the department of agriculture was encroaching upon the public health and banking departments of the government.

"The money is coming out of the pockets of the farmers," Senator Gore, chairman of agriculture committee said. "It is the farming class the authors of wealth, that bear the brunt of the \$120,000,000 appropriation for a navy to send men to their death; of the \$95,000,000 for the army to butcher and kill. You will pass those bills in half an hour, yet you debate the bill to appropriate \$19,000,000 to benefit the farmers for two weeks."

FRIDAY IN CONGRESS.

Met at noon.
Debate on diplomatic appropriation bill continued.
Inter-state commerce committee heard testimony in favor of government control of petroleum production and oil pipe-lines.
Judiciary sub-committee continued hearing of impeachment charges against Justice Wright of District of Columbia supreme court.
Representative Henry, Texas, introduced a bill to prohibit use of the mails to telegraph and telephone "in furthering fraudulent stock exchange transactions."
Adjourned at 5:05 p. m., until 11 a. m. Saturday.

Met at noon.

Continued Panama canal tolls exemption debate.
Considered agricultural appropriation bill.
Adjourned at 6:10 p. m. to 11 a. m. Saturday.

WASHINGTON, May 15.—Final

action on the agricultural appropriation bill was delayed in the senate again today by continued objections to various items in the measure. An appropriation of \$50,000 for the study of co-operation among farmers in matters of rural credits and sanitation was the chief object of attack. Senator Martin chairman of the appropriations committee said this expenditure would be useless and that the department of agriculture was encroaching upon the public health and banking departments of the government.

"The money is coming out of the pockets of the farmers," Senator Gore, chairman of agriculture committee said. "It is the farming class the authors of wealth, that bear the brunt of the \$120,000,000 appropriation for a navy to send men to their death; of the \$95,000,000 for the army to butcher and kill. You will pass those bills in half an hour, yet you debate the bill to appropriate \$19,000,000 to benefit the farmers for two weeks."

Campaign Contributions.

Political campaign contributions became the subject of a general debate in the house today when Representative Rucker of Missouri, chairman of a house election committee presented a report embodying resolutions declaring that it was not a violation of the penal code for senators or representatives to seek contributions from their colleagues.

Republican Leader Mann had charged that Representative Doremus of Michigan chairman of the Democratic congressional committee had violated the criminal code by issuing a circular on Sept. 5th, last, assessing each senator and representative \$15,000 for campaign purposes.

Representative Mann characterized the report as a "white wash" of the Democrats. After considerable discussion the resolutions went over until tomorrow.

Wilson Will Sign Bills.

President Wilson tomorrow will sign bills passed by congress raising the American legations in Argentina and Chile to embassies. More than the usual ceremony and

A Gift From SCHRAM'S Is Sure To Please

Because the recipient immediately associates it with quality.

For years Schram and quality have been synonymous in the minds of the people of Jacksonville.

And this is true no matter how inexpensive the gift may be.

Speaking of inexpensive gifts, you will be surprised at the number of moderate priced gifts in most all lines which we are showing.

Selecting a graduation or wedding gift will be a pleasure here—it matters not how little or much you wish to spend—you are sure to find just what you want at a price to suit.

ILLINOIS WINS FROM CARTHAGE

TAKES ONE SIDED GAME BY
SCORE OF 14 TO 6.

Local Swatters Have No Trouble in Finding Mapes and Contest Lost Interest at Close.

Fourteen hits, five of them for two bases, and eight stolen bases, garnered by the Illinois players, coupled with numerous errors on the part of the Carthage team enabled Illinois to smother the visiting team by a score of 14 to 6 yesterday.

Starting out with two runs in the first inning, as a result of a hit batter and a home run by Reidner, Carthage team looked to be a dangerous proposition, but from that time on, however, Clifton and Urbaine, who succeeded him, in the seventh inning, had the Carthage toilers strictly at their mercy. Carthage scored one in the fifth, two in the sixth and one in the eighth, being helped in their scoring by their careless playing of the Illinois, men who knew that they had the game already tucked away.

Mapes, the visiting pitcher, had nothing that baffled the local batters. He had a slow delivery which proved to be easily solved as is shown by the hit column. With one run chalked up in the first inning, followed by four more in the second inning, Carthage boys seemed to realize that they were doomed to defeat and their resistance seemed to weaken from that time on. Two in the third and five in the fourth, but the result of the game so far beyond doubt that interest lagged in the contest.

Some bright spots in the contest were a running catch by Loomis, Carthage right fielder; Stewart's two base hits over the canvas in right field, and Reidner's home run.

The score:
Carthage, A. B. R. H.
Eicken, 2b 4 1 0
Loomis, rf 4 0 0
Reidner, 1b 3 2 2
Simmons, c 2 1 0
Fleming, 3b 4 1 1
Cotterman, ss 4 0 1
Flack, cf 3 0 0
Mapes, p 4 1 0
Myers, if 4 0 0
Totals 32 6 4

Illinois, R. B. R. H.
Gary, 2b 2 1 1
Stewart, cf 5 2 2
Banks, ss 4 2 1
Apple, lf 5 3 3
Darragh, c 4 3 1
Atchison, 1b 4 0 0
Pierce, rf 3 2 2
Harmon, 2b 5 1 3
Clifton, p 4 0 1
Urbaine, p 2 0 0
Totals 38 14 14

Score by Innings:
Carthage 2 0 0 1 2 0 1 0—6
Illinois 1 4 2 5 2 0 0 0—14

Summary:
Two base hits—Gary, Stewart 2.
Banks, Apple, Home run—Reidner.
First base on balls—Off Mapes, 5; off Clifton, 1; off Urbaine, 2. Struck out—By Clifton, 5; by Urbaine, 3; by Mapes, 4. Umpire—Clark.

LARGE NUMBER ATTENDS FUNERAL SERVICES FOR ALFRED WHARTON

Rev. George L. Snively Pays Tribute To Life of Deceased—Interment Made in Diamond Grove.

A number of relatives and friends gathered at Central Christian church Friday afternoon to pay a silent tribute of respect to the memory of Alfred Wharton, whose funeral services were held at the church at 2:30 o'clock. Among those in attendance were members of the Modern Woodmen, of the Christian church Sunday school and a number of employees of the Jacksonville State hospital, where Mr. Wharton was superintendent of the dairy for a number of years.

The services were conducted in an impressive manner by Rev. George L. Snively of Lewiston, who, after reciting a chapter from scriptures, delivered a eulogy of the exemplary life of the deceased. The minister spoke of Mr. Wharton's long affiliation with the Christian church, and of his work as a member of the official board for a number of years. He also dwelt at length on his cheerful and sunny disposition and paid a fitting tribute to his memory. Music was furnished by a quartet composed of Mrs. Wallace Brockman, Miss Cora Graham, Dr. Harris and W. W. Gilliam and the many beautiful flowers, among them a floral arc from the Woodmen, were cared for by Misses Edna Colby, Veda Colby, Emma Swanson and Alice Devlin.

Interment was made in Diamond Grove cemetery and the commitment services were in charge of the Modern Woodmen, A. L. Seeger of Roodhouse acting as master of ceremonies, J. Carl Joquin as venerable consul and H. H. Vasconcellos as worthy adviser. The bearers were: C. R. Knollenberg, Charles Rose and John N. Joquin from Camp 912, M. W. A. and George T. Douglas, Herbert Henderson and George Rhea of the Christian church.

LAST DAY OF DEMONSTRATION.

Today being the last day of the Hoover Electric Sweeper demonstration the Jacksonville Railway and Light Company will offer a special discount of 10 per cent on all sweepers sold between the hours of nine and twelve in the forenoon. The demonstration will close promptly at two p. m. to allow the factory representatives to catch the C. & A. 3:55 p. m. train to St. Louis. If you have not seen this wonderful sweeper and vacuum cleaner, combined, now is the best opportunity you will have.

RAILROAD NOTES.

Along the Sangamon river eastward there was recently a heavy downpour amounting almost to a cloudburst and it raised the river so high that the C. P. & S. L. bridge at Chandlerville was rendered weak so that for a short time passengers had to be transferred here, but a force is at work and will soon have things in shape again.

Special car No. 74 on the Burlington passed through the city yesterday with the superintendent and other officials.

F. O. Roach, baggage man on the C. P. & S. L. road has gone to Springfield to take the examination for extra brakeman.

George Henry Divers is getting his hand in as station porter at the C. & A. station.

Traffic is hardly as heavy generally as it was last week.

At the Car Shops.
Engine No. 59 with tank 55 attached is waiting its turn in the yards to go into the shops for repairs.

A number of engines and tenders have been run out of the round house making it look a trifle more deserted.

Engine No. 31 suffered a slight accident recently near Chandlerville breaking a cylinder head and cross head. She was sent into the shops and fixed up in the roundhouse and will shortly be ready for service.

Yesterday was pay day and the dispenser of shekels was on hand as usual making the boys happy.

John Devlin of the machine shop store room, is serving on the grand jury.

Switch engine No. 5 is cruising around the yards ready for service when called for.

John Hagel, upholsterer, has gone to Springfield with his mother for a short visit.

William Sheehan is acting as machine shop storekeeper while John Devlin is serving his country on the grand jury.

A veteran of the shops is Daniel Meline who has been at the hydraulic press for twenty years and is good for a number of years yet. That is the machine that presses the car wheels on the axles and the handling of the wheels and axles is no small task. Of course they have a pneumatic crane to help lift the heavy weight but still there is much to do that requires lots of muscle and Mr. Meline has worn out or outlasted a lot of men in his time and is a long way from being done up himself.

Engine No. 63 is nearly ready to go out. When one remembers the dilapidated condition it was in when it entered the shops he would hardly recognize the old hulk in the trim, new looking machine that is almost ready to go out. Give Imgrund and his men anything that ever ran by steam and they will make it as good as new.

James Dickens of the blacksmith shop is wrestling with a new job which he is handling all right under the direction of Foreman William Sainer.

Heretofore the "grand irons" or rods which serve as steps on the side of freight and other cars not passenger, have been simply in the shape of an elongated capital U belted to the side of the car. Sometimes a man in grabbing it would slip and his hand or foot would slide from the car and he would fall and be killed or injured. Now the government has a law that instead of being a plain U shaped rod it shall have at one end a vertical right angle so that a man slipping will have a better hold and the first or lower step or "grab iron" must conform to this law and Mr. Dickens is preparing a lot of them.

Charles Pires of the blacksmith shop is serving on the petty jury this week.

Daniel Fernandes has been employed as machine shop helper.

Frank Doolin who has been employed as helper in the blacksmith shop has resigned to take a position as conductor on the street railroad for a while.

Leslie Hill has been employed as helper in the blacksmith shop.

Cyril, the son of William Sainer, was taken to Our Savior's hospital for an operation which he endured all right and has the prospect of early recovery which will be gratifying news to Mr. Sainer's numerous friends.

The veteran blacksmith, George Yeck, spent Sunday with friends and relatives in Beardstown.

Peter Meder, helper in the blacksmith shop, spent a day recently in Meredosia fishing with fair success.

C. S. Branch, superintendent of motive power, spent Thursday at the shops.

Frank Davidson, formerly of Goodland, Kansas and now assistant foreman in the boiler shop, is contemplating matrimony at an early date.

Leo Hagerty, William Quinlan, Hugh Craddock, George Crospitz, Walter Quinlan all are contemplating a visit with friends in Springfield Sunday.

Work on caboose No. 36 is still proceeding but much yet remains to be done.

Edgar Davis has been employed as laborer in the machine shop.

Peter Betzer and O. E. Draper have been added to the laboring gang.

A lot of twisted and scorched trucks and other metal is in the yards the relics of the explosion of dynamite and subsequent fire.

D. Shick has been employed as a laborer.

MINISTER FROM PETERSBURG
A CENTRAL CRISTIAN

The pulpit supply committee of the Central Christian church have arranged with the Rev. W. M. Groves of Petersburg to preach Sunday morning and evening. Rev. Mr. Groves preached for the church several months in 1910 and his many friends will be pleased to hear him again.

ILLINOIS MEETS MILLIKIN TO-DAY

FAST DUAL TRACK CONTEST IS
SCHEDULED.

Local College Athletes Are Expecting a Hard Fought Victory To-day From Decatur Men—Acker and Wilson of Springfield to Oppose Each Other.

One of the fastest track meets of the season will be put on this afternoon when Millikin and Illinois contest at 2 o'clock. Last year was the first year that Millikin has won and the meet and the local athletes expect to come back on the winning side. The events listed are the 100 yard dash, 220 yard dash, 440 yard dash, 880 yard dash, mile, 120 yard hurdles, 220 yard hurdles, mile relay race, discus throw, shot put, hammer throw, high jump, broad jump, pole vault.

Millikin has some splendid athletes and Illinois will have to go some to win. Tension is Millikin's star sprinter, and looks sure for the 100 yard dash and 220. In fact he holds the inter-collegiate record on the 220, covering the distance in 22 2-5 seconds. He has run the 100 yard dash several times in 10 1-5 seconds.

There will be a lively scrap in the 440 and 880 yard runs. Acker of Millikin and Wilson of Illinois will meet in these events. Both are former Springfield students. Hemple and Sooy will fight it out in the mile. Sooy is the local runner and was beat out of the mile last year at Millikin by about three feet. Sooy beat Hemple at the state meet and expects to repeat the performance today. Alford, Young, Wilson and Sooy in distance runs will set a fast pace for the Millikin runners and the star Tension will not do much leitering.

Dickerman of Millikin looks good for the hammer throw. He won in the state meet last year throwing the lead, 124 feet, 5 inches. Reeder for the visitors is also certain of the shot put.

Urbaine and Frisbie will likely walk away with the discus event for Illinois, and Frisbie in the hurdles is better than anything Millikin can show. Morrison in the high jump tied for the honors at the state meet last year. He and Davis should give Illinois 8 points on this event. The relay race counts points, for first and second place, five and three. Illinois expects to win the pole vault both in first and second place as Millikin's man only went 9 feet in the Illinois and Wesleyan meet last Saturday.

The officials will be: W. A. Gore, referee; George Orear, starter; Judges, W. B. Miser, T. P. Carter, J. G. Ames and John Millikin is to name. Time-keepers: Professor J. H. Rayhill and Robbins Russell.

AUTOMOBILE NOTES.

Louis Perbix and family came up to the city yesterday from Chapin in their Mitchell car.

C. D. Chapman and wife journeyed from Manchester to the city yesterday in their Cadillac car.

Mr. Northcott of Scott county made a trip to the city yesterday with his family in his Ford car.

M. Pine and several friends came up to the city yesterday from Bluffs in Mr. Pine's Ford car.

C. N. Priest made a trip to Winchester yesterday on business in a Ford car.

E. G. Soward, representing the Thomas Jeffery automobile, of Kenosha, Wisconsin, is in the city on business connected with his establishment which makes the new, light four cylinder car.

Mr. and Mrs. Frank G. Hunter of Sinclair drove to the city yesterday in their International car.

Mr. and Mrs. L. C. Funk of Manchester made a business trip to the city yesterday in their Cadillac car.

Burl Hornbeck and Bessie and Gladys Chance rode to the city yesterday from Winchester in Mr. Hornbeck's Ford car.

Herman Lippert and daughter, Mr. Brunk and Mrs. Pfeil all drove to the city yesterday from north of Concord in Mr. Lippert's McFarland 6 car.

Wm. S. Brownlow and family were city visitors yesterday from Chapin coming in a Maxwell car.

Charles Ogle and family of the northwest part of the county came to the city yesterday in their Maxwell car.

Robert Craig and wife of North Prairie were visitors in the city yesterday coming in their Hudson car.

Z. L. Rexroat and family were visitors from Cass county yesterday coming in their automobile.

C. H. Brown of Waverly made a trip to the city yesterday in his Overland car.

Elmer Coulson and friends drove up to the city yesterday from Chapin in their Overland car.

C. S. Thornley of Arenzville was among the visitors in the city yesterday coming in his Midland car.

J. Skinner drove to Meredosia in his Reo car yesterday.

Special—Large pitcher with can of baking powder. Claus Tea Co.

PURCHASES THREE COLLEGES.
Prof. G. W. Brown came to Jacksonville yesterday to spend several days. The public will be interested in knowing that Prof. Brown has recently purchased the three business colleges located at Sterling, Ottawa and LaSalle. He purchased the college at Kankakee some months ago and so his recent acquisition gives him a good start toward another "string" of Brown's Business colleges.

BUILDING BUSINESS ON QUALITY

THE VALUE OF OUR BUSINESS is the pleasure, prestige, profit and satisfaction derived from it.

WE HAVE BUILT OUR BUSINESS not with an eye to the volume each day, but to the stability of the passing years. We base its future permanency and ever increasing growth on the degree of satisfaction we create by the quality of our merchandise, our organization, our facilities, and our business policy.

THE BRANDS WE FEATURE are unsurpassed for quality in their respective class and to maintain constant and unvarying uniformity we exercise a vigilance, energy and ambition that is an embodiment of our business honor.

WE are in full accord with the declaration that "Quality is remembered long after price is forgotten" and that business gained on quality is staple, sound and loyal.

MISS AUDREY BERRYMAN ENTERTAINED THE MEMBERS OF THE ILLI WOCO STAFF AT HER HOME ON THE VANDALA ROAD AT AN INFORMAL DINNER SATURDAY EVENING.

The Illi Woco is the Woman's college annual, being published for the first time this year by the junior class. The members of the staff are:

Editor-in-chief—Miss Audrey Berryman.

Assistant Editor—Miss Mary Louise Powell.

Business Manager—Miss Josephine Ross.

Assistant Business Manager—Miss Winnifred Burmeister.

Associate Editors—Misses Effie Theobald and Helen Dinsmore.

Art Editor—Miss Feril Hess.

Faculty Advisor—Miss Anderson.

The Business Men's Bible class of State Street Presbyterian church was entertained by Dr. C. C. Cochran, teacher of the class, at a 6:30 dinner Friday evening in the dining room of the church. The dinner was served by members of the Ladies' Aid Society.

A program which followed, and which was considered by the members of the class to have been of unusual merit, consisted of a violin solo by Dean Cochran, accompanied by his teacher, Mr. William E. Kritch; a vocal solo by Miss Jessie Cox and a reading by Miss Esther Spoons. Dr. Cochran, the chairman, then called upon Secretary James R. Watt of the Y. M. C. A., who responded in a few well chosen remarks to the question, "How can Men be Best Interested in the Study of the Bible?" Mr. Watt did not peak optimistically of the interest taken by the average business man in personal Bible study.

The Rev. H. D. French responded to the sentiment, "What Can the Men do for the Sunday School?" and Dr. A. B. Morey addressed the company on "What Can The Sunday School do for the Men?"

The East End Embroidery club met with Mrs. M. McNamara Friday afternoon at her home, 846 Doolin avenue with a full attendance. After the usual two hours of business a musical was enjoyed, given by Mrs. Otto Kuchmann. Elegant refreshments were served after which the following election of officers was held:

President—Mrs. Andrew McNamara.

Vice president—Mrs. John Pires.

Secretary—Mrs. Mathew McNamara.

Treasurer—Mrs. Smith.

Charge of Birthday Fund—Mrs. Maxwell.

Reporter—Mrs. McKay.

A meeting of the Woman's Home Missionary society of Centenary M. E. church was held Friday afternoon at the home of Mrs. W. H. Rexroat on East College avenue.

Mrs. William Wilkison had charge of the program and the lesson studied was "The New America." A piano solo was played by Ruth Wilkison. The hostess served some delightful refreshments.

At the business session the following officers were elected:

President—Mrs. A. C. Metcalf.

Vice president—Mrs. G. W. Flagg.

Secretary—Mrs. William Wilkison.

Treasurer—Mrs. Charles F. Glosop.

Corresponding secretary—Mrs. Wharton.

HAVE LEASED NURSES HOME.

The management of Maplewood Sanatorium yesterday leased from T. H. Buckthorpe the property at the Northwest corner of Edmond and South Diamond street to be used as a home for nurses. The house is one of eight rooms and by its use there will be added available space at the Sanatorium proper. Thirty-one patients are now being cared for at Maplewood and Maplecrest and practically every available room is occupied.

ADELPHIAN SOCIETY IN
LAST PROGRAM OF YEAR

High School Literary Organization Appears for Farewell Performance Before Auditorium Crowded by Friends of Young People.

The final meeting of the Adelpian society for the school year was held Friday evening at the high school and when Byron Carpenter, the president, called for order at 8 o'clock there was not a vacant seat in the auditorium. The first part of the program consisted of musical numbers, after which seven Adelpian members presented a one act comedy entitled "Our Aunt from California." In making his farewell speech as president of the society, Mr. Carpenter appeared probably for the last time on the high school platform as he expects soon to change his residence to Bloomington. The program from first to last was roundly enjoyed and all felt the evening exceedingly well spent.

The program:

Clarinet solo—Willbur Rogers.

Piano solo—Miss Hazel Clays.

Violin duet—Harold Dunlap.

Dawson Darley.

"Our Aunt from California" cast:

Fellisa Needy, Miss Dorothy Weber; Rosalie Needy, Miss Hazel Widmayer; Sally Needy, Miss Helen B. Harney; the mother, Mrs. Needy, Miss Lillian Carter; Miss (Wilcox) Gibbs, dressmaker, Miss Carrie Mackness; Mrs. Mary Muntobury, the aunt, Miss Mardell McDougall; Molly, the maid, Miss Irene Smith.

While there is not yet need for Morgan county farmers to become gloomy over the crop outlook the fact is that conditions are not the best possible. Rain would be a help to wheat, corn and oats and especially to the vast mentioned. The weevil which worked recently in clover did a good deal of damage and made it necessary to plow up a number of fields which otherwise would have been left standing. The Hessian fly has already made its appearance in some localities but just what the extent of the damage will be cannot yet be determined. There is some prospect of chin bugs, warning with reference to them having been sent out by the university experiment station.

FUNERAL OF MISS VOSSLER.

Funeral services for Miss Nellie Vossler were held Friday afternoon at the home of her father, A. O. Vossler in White Hall in charge of Rev. John Rugh. Miss Vossler who was well known by a great many Jacksonville people died several days since after a long illness. She was taken ill in Petoskey, Mich., in August 1912 and was never in good health afterward although she spent some time in Colorado and for a long time was in St. Luke's hospital in Chicago. Blood impoverishment was the cause of her death.

GOSSIP OF THE FOYER

"The Knife," one of the new plays which Eugene Walter has ready for use next season, has a surgeon as one of its principal figures. Walter also has completed a dramatization of Jack London's novel, "The Valley of the Moon."

Mr. and Mrs. Frederic Hatton, the authors of "Years of Discretion," have intrusted a new work entitled "The Call of Youth," to Joseph M. Gaites for production in Chicago early next month. The cast will include Gertrude Coghlan, Mary Nash, Virginia Hammond, Walter Hampden and Arthur Stanford.

"From Soup to Nuts" is the title selected for a new musical review to be produced next season by Arthur Hammerstein.

David Belasco has presented Janet Beecher in a new play called "What's Wrong" by Frederick Ballard, author of "Believe Me, Xantippe."

Since Cosmo Hamilton, the English novelist and playwright, took up writing as a career he has produced about 29 plays and nearly as many books.

Julia Dean has been engaged to appear next season in a new drama by George Broadhurst. With the exception of a maid, the character assigned Miss Dean will be the only woman in the play.

At 79 years of age Sarah Barnhardt continues to play Camille and other tragic heroines with a fire and abandon that the younger generation of actresses has not been able to touch.

Here is Lore for Bargain
Lovers

There is just one way in which a store can show its supremacy every day in the week, year in and year out, and that is by offering values so far above the ordinary that its supremacy cannot be questioned. Through the merit of its offerings each week this store has risen to its present dominating position in the dry goods business. The values offered this week are exceptional. The qualities are the highest—the styles the latest, and the prices a bulkwork recognized as impregnable.

\$1.00 Cotton Suitings for Only 69c

IMPROVEMENT STILL SLOW IN DEVELOPING

DUN'S AND BRADSTREET'S WEEKLY REVIEW OF TRADE AND INDUSTRY.

Report Conditions Not Satisfactory But Most Advices Indicate That Trend is in Right Direction.—Trading in General Lacks Snap.—There is Little Forward Buying.

New York, May 15.—Dun's Review tomorrow will say: "Further strengthening of confidence is manifest as a result of the betterment in some branches of business. Improvement is still slow in developing and progress is not uniform, yet rather more cheerful reports are received from the leading centers.

Conditions, as a whole, are not entirely satisfactory but most advices indicate that the trend is in the right direction. Perhaps the best feature is the more hopeful feeling in iron and steel and the signs of reviving activity apparent both in finished lines and in pig iron. There is also a better sentiment in the drygoods trade.

"The commodity markets displayed somewhat more activity this week with the tendency, however, still towards a lower level. "Failures this week are 336 against 290 last year; in Canada 40 against 45.

Bradstreet's Report.

New York, May 15.—Bradstreet's tomorrow will say:

"Optimistic sentiments, based on brilliant crop prospects tend to spread over industrial and commercial channels but the situation is one in which anticipations are more prominent than performances. There are signs that the country is getting ready for improvement to come. However, trading in general lacks snap, there is little forward buying, orders for current uses are of small lot but frequent type and it is probable that business in general is slightly behind 1913.

"The consensus of reports is that mail order business is increasing greatly. Country trade is dull. Crop conditions are remarkably good. In the industrial lines the pace of operations is slow but in iron and steel sentiment is brighter."

SUNDAY SCHOOL SOCIAL.

Wednesday night at the Christian church in Woodson there was a Sunday school social which was a delightful occasion. It was both formal and social and both parts of the program were thoroughly enjoyed. There were several musical and other numbers all of which were admirably performed and then came a social time which was equally enjoyable. Nice refreshments added to the pleasure of the occasion and all present, and there were a good many, voted the occasion a complete success.

Fresh roasted Jumbo peanuts, 15 cents per pound. Claus Tea Co.

HI' JASPER, A PITCHE!

DISCOVERED BY ACCIDENT

Now White Sox Player Began Career On Jacksonville Diamond.

Every ball fan in Jacksonville remembers "Hi" Jasper when he played here four years ago. He was of the "brush" variety then, but now is a valued pitcher of the White Sox. Irving Vaughan in writing of him in the Record Herald says:

Here's a big league recruit with an interesting career. He is Harry "Hi" Jasper, a right handed "spit-ball" pitcher, now on the White Sox roster. Jasper is one of the few fellows who refused to take organized baseball seriously and got away with it. This, along with the facts that he just about became a pitcher over night and now threatens to make a place for himself in the big show, makes his brief career an exciting one.

Back in 1910 there came to the Jacksonville, Ill., team a stocky youngster with ambitions to become a shortstop. He dubbed around there for a while and finally won a job. One man who was fired from that same team was Larry Chappell, who a few years later was purchased by the White Sox for the sum of \$18,000.

Jasper, the infielder, looked good enough to advance, so in 1911 was purchased by the Dubuque, Iowa club of the Three I league and played short there that season. In the spring of 1912 he was injured and this same injury is the thing that gave him the pitching "bug." Only for this he might have spent his life in the minors, unknown to fame.

After brooding over his injury he went to the Dubuque club owner and said he was going to take up pitching and asked for a release so he could go away, find a small team, in some obscure spot and learn the hurling art from the bottom. But his owner balked. Jasper refused to give up his scheme, however, and finally received permission to depart with the understanding that as soon as he was ready to blossom out as a pitcher the Dubuque club would claim him.

Jasper, the would-be pitcher, then discovered a town by the name of Anadarko, Okla., and steeled there under the guise of a pitcher. He worked in exactly four games, when a scout blew along, looked him over and wired the Cincinnati club to buy him. Thinking a flyer in the big show would do him no harm Jasper immediately started for Cincinnati.

Had he been able to tell in advance just what was going to happen, Jasper might have remained in Anadarko. Anyway, he reported to Hank O'Day, then manager of the Reds. Hank told him to warm up during practice and show his wares to Heinie Pletz, but Jasper informed Hank that he wanted to pitch "to some of those alleged hitters you got around here." He did, and "the alleged hitters" couldn't touch him. He did this with a lot of speed and a curve ball, the spitter not being in his assortment at that time.

Jasper made a fine impression, so when the Reds started on the road he went with them. That was their last trip through the west in the fall of 1912. When Jasper reached St. Louis, which was his home town, his conscience began to bother him. He was kept awake nights by the thought that there might be trouble when the Dubuque team discovered his loss. He decided to go back, so went to the Cardinals' park, handed his suit roll to the ground keeper, told him to tell O'Day that Jasper had quit, and went home.

O'Day learned of it and went mad. He hot-footed it to Jasper's hiding place and asked the father if his son was crazy. The father replied that he didn't think so. Persuasion did no good, so the Cincinnati club finally agreed to call off the deal, and the young pitcher went back to Anadarko. Jasper gave the cause that he wasn't ready to pitch.

Luck then traveled with Jasper. Shortly after he returned to Oklahoma the league blew up, so in the spring of 1913 Jasper showed up at Dubuque with the information that he was a pitcher. During the spring work some one asked him why he didn't purchase a nickel's worth of slippery elm and be a spit-ball "pitcher." This had never occurred to him, but he thought the suggestion a good one, so when opening day came along and he was asked to show whether he had mastered the art of pitching he went to the hill with his slippery elm and what he did that day won him big league recognition.

In that game he fanned 17 batters and allowed one hit. It was the first time he had ever pitched a "spitball," so his success was remarkable. Billy Sullivan was immediately dispatched to look over the men and after the veteran catcher had worked with him at Dubuque he returned and implored Comiskey to make the purchase. Comiskey did and later in the summer Jasper visited the Sox grounds, pitched to the regular team with the goofs lacking him in the morning game and in seven innings Fournier was the only man to hit him safely.

On the spring training trip he looked the part of a corner every time he appeared. Along with his speed, curve and "spitter" which, by the way, has a big break, he possesses what he calls a "spitless spitter." It is thrown without the use of saliva and has a peculiar break. His success with this freak ball as well as with the ordinary "spitter" is said to be due to a hand of unusual length. And he is the kind of a pitcher who has nerve enough to attempt a "spitter" when the count is 3 to 2.

Putting on the Fat

Out on my farm I am giving a practical demonstration of what can be accomplished with the Wood's Grain Softener.

There are 43 cattle in the bunch. Each steer is getting a peck of corn daily. It is ground, cob and all and then cooked. In addition to the corn, each steer gets about nine pounds of clover hay a day and straw is near them all the time. A man with long experience, who has been watching these cattle, says they are putting on three to four pounds a day. They are sure making good money and the reason is that corn prepared in my cooker has far more nutriment value than fed in the ordinary way. Come and see these cattle.

CHAS. WOOD, Jacksonville, R. R.

View of Memorial Service For Vera Cruz Dead at Brooklyn Navy Yard and Latest Picture of President.

Photos copyright, 1914, by American Press Association.

Memorial services were held at the Brooklyn navy yard over the bodies of seventeen sailors and marines killed at Vera Cruz. President Wilson made an address, and Secretary of the Navy Daniels and other notables were present. The picture shows a general view of the navy yard parade grounds upon the arrival of the coffins on caissons drawn by four horses each and each under guard. The picture of the president was taken on this occasion and shows how the Mexican trouble has added to the lines in his face.

ILLINOIS NEWS NOTES.

Playing Soldier Proved Dangerous—Eugene Reed, aged three was probably fatally wounded at Roseville, near Galesburg by the discharge of a small rifle while he and his brother aged five, were playing soldier.

New Pastor for Springfield—Rev. Frank W. Allen of Paris, Mo., has accepted the invitation to become the pastor of the First Christian church of Springfield and will enter upon his duties there September first. The church has been without a pastor since Rev. F. W. Burnham accepted a call to a church at Los Angeles last January. Rev. Mr. Allen has made an excellent record in Paris.

Will Banquet Supreme Court—A notable banquet is to be given at the Country Club in Joliet next Saturday when members of the Illinois Supreme court will be the guests of honor. Judge Dorrance Dibel will be the toastmaster and members of the bar will be present from Kane, Kendall, La Salle, Grundy, Kankakee and Iroquois counties. One hundred reservations at five dollars a plate have been made for Will county attorneys.

"Q" Does Not Want Wabash—The recent rumor that the Burlington intends to purchase the Wabash has been refuted by a statement from Darius Miller, president of the Burlington, who says that the Hill interests have no thought of purchasing any part of the Wabash as an adjunct of feeder for their other lines. Rumor that the Hill lines were contemplating the purchase of the Wabash lines was started in February, when a party of "Q" officials made an extensive tour of the road, presumably with the intention of helping to reorganize it.

A Celebrated Case—A celebrated conspiracy case which originated in the courts of Will county will be argued in the appellate court in Chicago Saturday. William Geppart, convicted editor of the Musical Courier is making this fight to keep out of prison, and if he loses in the appellate decision will take his case still higher. Geppart was declared guilty after a long trial, of employing black-mailing tactics against John V. Steger of the Steger Piano Company.

To Organize Shrine Temple—Permission has been granted Springfield Masons to organize a temple of the Ancient Arabic Order, Nobles of the Mystic Shrine, following the presentation of a petition by Colonel Richings J. Shand to the imperial council of the Mystic Shriners, now in session, with 20,000 present at Atlanta, Ga. Nineteen Springfield Masons were in attendance at the annual meeting of that branch of Masonry, and the word that the dispensation which the local members sought was received by wire from Colonel Shand.

The organization of the local temple will make the fifth in this state. Temples of the Ancient Arabic Order, Nobles of the Mystic Shrine, in Illinois are located at Chicago, Peoria, East St. Louis and Rockford.

Want Auto Lights Dimmer—Up in Bloomington there is a proposition to require less brilliant lights on automobiles, the theory being that the average light is so intense that it proves blinding to pedestrians or people in other vehicles. The chief of police, the city attorney, members of the police committee and of the public safety committee of the Civic league have all had a conference on the matter.

White Hall Teachers Chosen—The Board of Education of White Hall has elected school officers for the ensuing year. J. B. Hendricks, the superintendent will receive a salary of \$1,500 and Robert G. Smith, the high school principal will receive \$900. The other high school teachers are, Miss Helen Ingersoll, Jacksonville; Miss Elizabeth Kirk and Miss Bernice Huff. The position of teacher of music, writing and drawing was abolished.

Awarded Damages Four Times—Mrs. Nellie M. Presley has been awarded damages of \$4,187 against the Bloomington & Normal Railway & Light Co., on account of the death of her husband. Mr. Presley was killed by a shock from an electric wire. This is the fourth verdict for the complainant. Three times verdicts have been rendered for her and each time on appeal to the appellate court have been remanded for trial.

Everything in the way of warm weather clothing at Knoles.

PARENT-TEACHERS MEETING.

The Parents-Teachers meeting of the Second Ward, Lafayette School, will be held Tuesday afternoon at 3:30. Election of officers. A full attendance is desired.

Field Perils.

By WALT MASON.

The farmer plants his field of corn and hoped that on some autumn morn he'll start to shuck his crop. And shuck his crop he often does, which is exceeding queer, for blights and perils fairly buzz around it thru the year. I think it strange that farmers raise the goodly crops they do, for they are scrapping all their days against a dead yew. To plant and till will not suffice; the men must strain their frames, to kill the bugs and worms and mice, and pests with Latin names. The cut worms cut, the chinchbugs chinch, the weevil weaves its ill, and other pests come up and pinch the corn and eat their fill. And then the rainworks go on strike, and gloom the world enshrouds, and up and down the burning pike the dust is blown in clouds. And if our prayers are of avail, and rain comes in the night, it often brings a grist of hail that riddles all in sight. And still the farmers raise their crops, and nail the shining plunk; none but the kicker stands and yawns, and what he says is bunk. If all men brooded o'er their woes, and looked ahead for grief, that gent would starve who gaily goes to thresh the golden sheaf.

Copyright, 1914 by Adams & Company Service

Walt Mason

NORWAY IS EN FETE FOR NATIONAL CELEBRATION

Centennial of Norway's Independence Will Be Observed.

Christiania, May 15.—All Norway is en fete today for the opening of the great national celebration in honor of the centennial of the independence of Norway from Denmark and in commemoration of a century of peace on the Scandinavian peninsula. From the capital down to the smallest hamlet and village business is at a standstill and the populace is giving itself up to the joyousness of the occasion.

The festivities were formally opened today with the inauguration of the centennial exposition in this city. The inauguration was participated in by King Haakon, Queen Maud, Crown Prince Olaf, many dignitaries of the state and church and members of the foreign diplomatic corps.

The scope of the exhibition is national in the widest sense. There are sections for the display of Norwegian industries; history and education, fine arts, manufactures, agriculture, mining and metallurgy, hygiene, women's section, and cottage industries. The buildings of the exposition are large and ornate, and strictly consonant with the natural beauty of the location, which is on the grounds of the old Frozner manor, one of the most beautiful and historical sites in the kingdom. Occupying an entirely separate site from the ground of the main exposition is the maritime division, which is devoted to displays of the Norwegian fisheries and shipping industry. The maritime division is at Skarpsno, directly opposite Oscarshal, the royal villa on Bygdoy.

Today the population of Christiania, which is about 250,000, has been nearly doubled by the visitors. Enormous crowds filled the exposition grounds for the inauguration ceremonies. The capital has for a week past been gayly decorated with the flags of all nations, most all of the houses on the principal streets and squares, particularly in the business section, and in that quarter of the city around the royal palace, being conspicuous for their elaborate decorations.

Sunday next will be the anniversary of the national independence and on that day a great procession will take place in Christiania. The procession will consist of the royal family, the court, the diplomatic corps and a host of other dignitaries, together with visiting delegations from all the districts and cities of Norway and some from abroad. Americans are expected to take a very conspicuous part in the procession and also in other features of the centennial celebration, to take place later. Occupying the place of honor in the procession will be the Decorah College band from Decorah, Iowa.

Already the centennial has proved to be a magnet to draw thousands of Norwegian-Americans back to their old homes. In addition, there are indications that the exposition and the attendant festivities will draw hundreds of thousands of European visitors to Norway for the first time this summer.

Norwegian-American day will be celebrated in Christiania on July 4. The preparations now making for the celebration indicate that it will be a gala occasion. The leading feature of the programme is to be the presentation to the city of a statue of Lincoln. The statue is a gift from Governor Hanna of North Dakota, who is expected to be present in person to deliver the oration of the day. Afterward there will be a reception by the American minister, Albert G. Schmiedman, and a banquet, attended by King Haakon.

ROMANTIC HISTORY OF TECK HOUSE.

London, May 15.—Announcement of the selection of Prince Alexander of Teck, the brother of Queen Mary, to succeed the Duke of Connaught as Governor General of Canada has served to again bring to mind the romantic history of the house of Teck. The status of the Teck family is most peculiar. Though descended from a morganatic marriage contracted seventy-five years ago, the family has given a queen consort to Great Britain, whose eldest son will, if he lives, succeed his father on the throne. Also worthy of mention and equally interesting is the fact that Prince Alexander of Teck, though his family has not been classed with royalty, is one generation nearer to George III. than is the present king. He is, through his mother, a great-grandson of that monarch, whereas George V. is a great-great-grandson. The first Duke of Teck was the son of Duke Alexander of Wurttemberg by his morganatic wife, Countess de Rhexey, who subsequently received the "augmentation" of Countess of Hohenstein. The Counts was not of "equal birth" of the Duke, and he could not obtain the consent of his kinsfolk to have the union treated as other than a morganatic marriage.

The offspring of this union, who might call himself Count of Hohenstein, Duke or Prince of Teck, as he listed, came to England and married Princess Mary of Cambridge. They were the parents of Queen Mary and Prince Alexander and his brothers. The marriage evoked a great deal of criticism, whose general nature is indicated by a story long current in London, which even if invention, is interesting. The Tecks were very poor, and it is said that when the late Duke of Cambridge, who thought aloud, heard the bridegroom promise to endow the bride with all his worldly goods, startled the audience by exclaiming: "By Jove! and Wales gave him his clothes."

CLASS DAY AT STANFORD.
Palo Alto, Cal., May 15.—Today was class day at Stanford university and the members of the senior class entertained their friends in splendid style. The day's programme began with the dedication of the class plate in the inner triangle. This afternoon President and Mrs. John Casper Branner held a reception for the graduates. In the course of the day there were many fashionable spreads by individuals and the various clubs of the university.

Read the Journal; 10c a week.

HOOVER DEMONSTRATION TODAY

Of the Modern Sanitary Way to "Clean House"

THE Hoover Suction Sweepers shake, vigorously sweeps and draws out all dirt in your rugs—without injury to the nap—in fact, brings it back to the correct position and restores the original colors. The action of the Hoover is this:

The air suction lifts the rug from the floor and holds it so that the electrically revolved brush (a Hoover patent) loosens the dirt, thread and lint embedded in the body of the rug. The powerful air suction sucks all the dirt out. This is the only way you can thoroughly clean and the Hoover is the only machine that does it. Will you come in and try the Hoover yourself? Do it today.

ed ball—Lapp. Wild pitch—Gregg.

St. Louis 9; Boston 3.

Boston, May 15.—The St. Louis
players found Bedient's delivery
easy of solution today and they bat-
ted out a 9 to 3 victory over Bos-
ton. Joe Wood made his first ap-
pearance since he was operated on
for appendicitis last February. He
had all his old time speed during
the one inning in which he figured.
A home run by Walker over the left
field fence was one of the longest
hits ever made on the local grounds.
The score:

Club	R.H.E.
St. Louis	300 020 040—9 12 0
Boston	000 010 002—3 8 3

HOW WOMEN AVOID OPERATIONS

By Taking Lydia E. Pinkham's Vegetable Compound.

Cleveland, Ohio—"My left side pained me so for several years that I expected to have to undergo an operation, but the first bottle I took of Lydia E. Pinkham's Vegetable Compound relieved me of the pains in my side and I continued its use until I became regular and free from pains. I had asked several doctors if there was anything I could take to help me and they said there was nothing that they knew of. I am thankful for such a good medicine and will always give it the highest praise."

—Mrs. C. H. GRIFFITH, 7305 Madison Ave., Cleveland, Ohio.

Hanover, Pa.—"I suffered from female trouble and the pains were so bad at times that I could not sit down. The doctor advised a severe operation but my husband got me Lydia E. Pinkham's Vegetable Compound and I experienced great relief in a short time. Now I feel like a new person and can do a hard day's work and not mind it. What joy and happiness it is to be well once more. I am always ready and willing to speak a good word for the Compound."

—Mrs. ADA WILT, 196 Stock St., Hanover, Pa.

If there are any complications you do not understand write to Lydia E. Pinkham Medicine Co. (Confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and all in strict confidence.

Men Pay Homage to Mother's Friend

"I am not surprised to observe the number of men who come into the store to purchase 'Mother's Friend,'" remarked a leading druggist.

The expectant mother if she has heard of this splendid embrocation is probably not reading the papers to much extent. And if she does it is a happy thought to send hubby to the drug store. "Mother's Friend" is applied externally over the abdominal muscles.

It is a gentle, soothing lubricant, penetrates to the fine network of nerves beneath the skin and has a marked tendency to relieve the muscular strain to which these broad, flat abdominal muscles are subjected. The cords, tendons and ligaments are thus permitted to stretch without the corresponding surface strain so often involved during the period of expectation. This in turn keeps the entire absence, in many cases reported, of nausea, morning sickness and other distresses. And particularly to young mothers is this remedial application of inestimable value since in thus keeping the muscles firm but pliant it enables them to go through the ordeal without laceration of the epidermis so often the case when this gentle form of lubrication is neglected.

"Mother's Friend" is highly recommended by a host of women. Write Bradfield Regulator Co., 508 Lamar Bldg., Atlanta, Ga., and we will send you a valuable little book to expectant mothers. The effect of this splendid external application is an expression of the thousands of women who have successfully used it and recommended it through two generations.

WATERY BLISTERS ON CHILD'S FACE

Kept Scratching Until Cheeks Fiery Red, Skin Cracked and Scaly, Itched and Burned. Used Cuticura Soap and Ointment. No Return of Trouble.

Smithville, Ind.—"Six months ago our baby girl, one year old, had a few red pimples come on her face which gradually spread causing her face to become very irritated and a fiery red color. The pimples on the child's face were at first small watery blisters just a small blotch on the skin. She kept scratching at this until in a few days her whole cheeks were fiery red color and instead of the little blisters the skin was cracked and scaly looking and seemed to itch and burn very much.

"We used a number of remedies which seemed to give relief for a short time then leave her face worse than ever. Finally we got a cake of Cuticura Soap and a box of Cuticura Ointment. I washed the child's face with very warm water and Cuticura Soap, then applied the Cuticura Ointment very lightly. After doing this about three times a day the itching and burning seemed entirely gone in two days' time. Inside of two weeks' time her face seemed well. That was eight months ago and there has been no return of the trouble." (Signed) Mrs. A. K. Wooden, Nov. 4, 1912.

Cuticura Soap and Ointment do so much for poor complexions, red, rough hands, and dry, thin and falling hair, and cost so little, that it is almost criminal not to use them. Sold by dealers throughout the world. Liberal sample of each mailed free, with 32-page book on the skin and scalp. Address postcard "Cuticura, Dept. T, Boston."

Men who shave and shampoo with Cuticura Soap will find it best for skin and scalp.

First Pictures Showing the Utter Destruction Of Nuevo Laredo by American Hating Mexicans.

Photos copyright, 1914, by American Press Association.

These are the first pictures to reach the United States of the destruction of Nuevo Laredo, Mexico, just across the Rio Grande from Laredo, Tex. The top picture shows the desolation wrought in the main street of the town by the Mexicans, who, fired by hatred for Americans and fearing that the United States troops would capture the place, dynamited the buildings and set fire to them. The bottom picture shows a few Mexican women amid the ruins of their homes.

SOY BEANS GREAT THING FOR SOIL BETTERMENT

Their Use and Value—Fertilization—Their Place in the Rotation—When and How to Sow.

Historical—The soy bean, also called "soja bean" and "soya bean," is an annual leguminous plant, native of southeastern Asia and has been extensively cultivated in China and Japan for many centuries. In those countries it occupies an important place among human food plants, supplying a large amount of easily digested nitrogenous matter. Its adaptability to this country has been amply demonstrated by experiment station and practicing farmers. It has come to stay. Its value as a forage crop and its wonderful effects as a soil improver have given it a secure foothold on many farms in Illinois.

On most Illinois soils the soy bean will generally give best results as a grain crop, though it is excellent as a cover crop for green manure for plowing under, as it provides a large amount of organic matter rich in nitrogen. The demand for seed for planting has, so far taken up all the seed offered on the market in this state, and doubtless the rapid extension of the use of the crop will continue for some years longer to keep up a strong demand for seed. As a highly educated nitrogenous feeding stuff for mixing with corn for "hogging off," with corn as a supplement, the crop has a value almost, if not quite, equal to its value on the seed market.

Fertilization—It must be clearly understood that this crop can not thrive without food. Its mineral food must come out of the soil and it can not get nitrogen out of the air unless it is properly inoculated. Soils which are naturally unproductive, or are badly run down by long years of cropping without adequate returns, can not be expected all at once to give wonderful crops of Soy beans. However, with attention to drainage, liming the soil, and such applications of rock phosphate as the soil may need, this crop will do better than almost anything else on run down land. Wherever organic matter and nitrogen are lacking there is no quicker or cheaper method of correction than the use of this plant.

Place in the Rotation—In the corn belt generally, probably the best place in a regular rotation is after corn. A good rotation consists of corn, soy beans, wheat and clover, with soy beans again if clover fails. With this rotation, only the mineral elements of plant food need be applied in order to maintain soil fertility.

When and How to Sow.

For Cover Crop—Soy beans may be sown between the corn rows at last cultivation with a one-horse wheat drill, using the middle three

hoes, although the shading by the corn will not give them the same chance as when allowed full possession of the ground after a small grain crop.

For sowing after harvest on oat or wheat stubble fields where clover has not been sown or failed, or after early potatoes, and as an orchard cover crop, soy beans can not be too highly recommended. For this purpose the seed may be drilled solid at the rate of 1 to 1.5 bushels per acre after either double disking and harrowing or plowing and harrowing the stubble ground.

For a Full Crop—For a full crop, the best time to sow is when the ground is thoroughly warm in the spring, or immediately after the best time to plant corn, although the earlier varieties may be sown some weeks later and still have time to mature. As a cover crop which may be pastured in fall or plowed under, soy beans may be sown after a summer harvested crop even as late as the end of July and still make profitable growth.

Whether to plant in rows for cultivation or drill solid without subsequent cultivation is a matter for the individual farmer to determine according to his particular conditions. In planting for cultivation the rows may be 24 to 48 inches apart. Rows 36 inches apart can be easily cultivated with a two-horse cultivator. The closer spacing of rows is preferable for hay production and under favorable conditions drilling solid may be best for this purpose. As a cover crop sown later in season, seed should be drilled solid at the rate of at least a bushel per acre.

The wheat drill is the most convenient implement for seeding. For drilling solid, the drill should be set from 1.5 to 2 bushels of oats per acre, which will require from 1 to 1.5 bushels of seed per acre of the medium sized varieties. For drilling in rows the drill should be set for 2 to 2.5 bushels of oats per acre, according to spacing, which will require about 25 to 30 pounds of seed per acre.

Harvesting—When intended to use as hay, the soy bean should be cut soon after the pods are about half developed. If left much later the stems become quite woody and inferior in feeding quality. The method of haying making is not radically different from that used with clover, but the curing process takes a little more time. In bright weather the crop may be mowed one day, windrowed the next, turned the third and put in small cocks, where it should partially cure before putting into the barn or stack two or three days later.

When harvesting for seed the most satisfactory method is to cut the crop with a mower having a good side delivery attachment which clears the track for the team on the next round. If planted in rows and cultivated, the ground can hardly be kept quite level and a special arrangement may be needed to raise

the sickle bar sufficiently to keep it from dragging on the rows. The self binder may also be satisfactorily used for harvesting this crop. Cut the crop for seed as soon as most of the pods are ripe. At this stage, yellow and many will have fallen off. The crop will be ready for storing or threshing soon after cutting. A very satisfactory method is to stack the crop soon after cutting and then thresh from the stack at a later convenient time.

Threshing—Threshing may be done very satisfactorily with the common threshing arranged so as to run the cylinder at about half the usual speed for threshing wheat or oats, without changing the speed of the separator, by means of two extra pulleys of double the usual circumference, which are put in place of the regular ones at either end of the cylinder shaft. In addition, most of the concave teeth should be removed and, possibly, a board put in place of the lower concave. A machine fitted in this way may be made to do clean work without splitting many of the seeds. A corn shredder can also be used for threshing the beans as they shell out readily when ripe and properly dried.—H. A. McKeene, Secretary, Illinois Farmers' Institute.

STOMACH UPSET?

Get at the Real Cause—Take Dr. Edward's Olive Tablets.

That's what thousands of stomach sufferers are doing now. Instead of taking tonics, or trying to patch up a poor digestion, they are attacking the real cause of the ailment—clogged liver and disordered bowels.

Dr. Edward's Olive Tablets arouse the liver in a soothing, healing way, when the liver and bowels are performing their natural function away goes indigestion and stomach troubles.

If you have a bad taste in your mouth, tongue coated, appetite poor, lazy, don't care feeling, no ambition or energy, troubled with undigested food, you should take Olive Tablets, the substitute for calomel. Dr. Edward's Olive Tablets are a purely vegetable compound mixed with olive oil. You will know them by their olive color. They do the work without griping, cramps or pain.

Take one or two at bedtime for quick relief, so you can eat what you like. At 10c and 25c the box. The Olive Tablet Company, Columbus, Ohio.

WILL NOT BE CANDIDATE.

Washington, May 14.—Senator Bradley of Kentucky, Republican, announced tonight that ill health and inability to bear the hardships of a campaign compelled him to announce that he will not be a candidate for re-election. He is serving his first term which ends next March.

POLITICS AND POLITICIANS.

A statue of the late Senator Allison of Iowa is soon to be erected on the capitol grounds in Des Moines. Interest in the general primaries to be held in Pennsylvania next week centers in the contest of Senator Penrose for renomination.

Maine's four representatives in congress are to have no opposition for renomination in the general primaries to be held next month.

The Progressive party in Oklahoma has decided to put a full state ticket in the field this fall, headed by John P. Hickam as candidate for governor.

The leading feature in South Carolina politics just now is the fight of Governor Blaise for the seat of Ellison D. Smith in the United States senate.

Republicans of Missouri are to meet in convention in St. Louis on May 27 to adopt a platform and make other preparations for the coming state campaign.

The Progressive party of Nebraska has determined to nominate candidates for all the state and congressional offices to be filled at the election next fall.

Thomas A. Kearney, a prominent attorney whose home is in Racine, has announced his candidacy for the Democratic nomination to succeed Senator Isaac Stephenson.

Alabama is soon to have another special election, this time to choose a successor to Congressman Henry Clayton, who has accepted a place on the federal bench.

There are said to be more aspirants in the field for the nominations for governor of California this year than ever before in the history of that state.

Former Congressman William A. Rodenburg of Illinois, who was one of the Republican "old guard" defeated in the election two years ago, will seek to "come back" this fall.

It is rumored in Missouri that Governor Major is planning to run for United States senator two years hence, when a successor to Senator James A. Reed is to be elected.

Former Governor Simeon S. Pennewill of Delaware is seeking the position of Republican national committeeman, recently relinquished by General T. Coleman DuPont.

The names of the Progressive candidates at the election in Maine this fall must be petitioned on to the ballots, because the party is not a factor in the last election in that state. The political opponents of Governor Eberhart in Minnesota express the opinion that he will have a hard time to secure renomination on the Republican ticket in the coming state primaries.

Under the new election law in Kansas it will be necessary for the voter to mark the name of each candidate for who he votes. It will no longer be possible to vote a straight ballot by marking the head of the ticket as formerly.

The Alabama campaign for 1914 is ended, but some hot political battles are still to be decided in Texas, Tennessee, Georgia and several other states of the south before the close of the present year.

The Road to Success.

The best brain effort and indigestion do not go hand in hand. If you would win a lasting success you must keep your stomach in good working order and your bowels regular. This is easily done if you go at it rightly. Mrs. C. C. Baker, Homer City, Pa., writes: "About two years ago I suffered from stomach trouble and constipation. After I began using Chamberlain's Tablets my condition improved. At the end of a week I could eat and sleep well." Sold by all dealers.—adv.

FARMERS NOTICE

We Are Now Manufacturing Fertilizers For Soil

We have made a careful study of soil conditions and are now putting up an article which is considered the best on the market for INCREASED YIELD OF Corn or Oats. The same has the following analysis:

Bone phosphate	63.09 per cent.
Phosphoric acid	28.90 per cent.
Nitrogen	2.53 per cent.
Ammonia	3.07 per cent.

If you will carefully compare the analysis of our ROYAL BRAND BONE MEAL, you will find that the same is cheaper than the use of Rock Phosphate or any other fertilizers which are now on the market.

It only requires from 100 to 150 pounds of our BONE MEAL to an acre of soil, depending upon the condition of the soil. This will increase your yield of corn or oats from 16 to 20 bushels to the acre for the first year.

ATHLETICS HAVE VALUE FOR STUDENTS

RECORDS SHOW THEIR USE IN
HIGH SCHOOL WORK.

Relationship Between Athletics and
Physical Training is Pointed Out
—Games Should Be Provided To
Interest Weak as Well as Strong.

(By Director George A. Huff, Uni-
versity of Illinois.—Abstract from
an address to High School Con-
ference.)

"It is well to remember that nearly all of our athletics have their beginning in the high schools and that a mighty force in our national life can be largely shaped and guided, either for good or for evil, by the high school administrators. It is well to bear in mind that I am speaking of athletics and not of physical training. They are closely related at some points and an exact definition of the difference between the subjects is somewhat difficult. But we may safely say that athletics is some form of a game embodying recreation as well as exercise—a contest between individuals, or often a number of individuals working in unison against a like number. Physical training is more concerned with body building, without reference to contests and is generally without recreation features which make athletics so attractive to the young. The distinction then seems to be that athletics is exercise done for enjoyment and excitement and that physical training is exercise to maintain and promote health and strength.

Physical Training.
"At first, though it would seem that the national step for our schools would be to emphasize and develop the work in physical training proper, I recognize the great value of physical training. We are only just beginning to realize the good that it will accomplish, but I do not believe that it would be wise to attempt to supplant athletics with physical training. We must remem-

ber that we are dealing with the young and the immature and that their viewpoint, not ours, must largely govern. The young must have some time to do the things they like to do and enjoy doing, as long as no harm results and it is our duty to guide and direct their activities into the right channels. If we enter into their activities wholeheartedly, with a genuine spirit, this guidance and direction will be successful.

"No one realizes more than I do that athletics should be but an incident in high school or university life and all other outside activities may be put in the same category. Music is an admirable study, but to neglect one's education for its pursuit would be a grave mistake. So with dramatics, social life, debating, oratory, newspaper work and athletics—all are of value and admirable as a supplement to the real work of the school, unless they are permitted to usurp too large a place. Students who can participate in these outside activities and at the same time maintain a high standard in the classroom should be encouraged—they are being rounded out and in many of these activities they are being fitted to make good citizens and leaders in after life.

"The modern system of highly specialized athletics in schools has been of comparatively recent origin. While at the beginning of the era of athletics, the system had generally, I think, the hearty endorsement of teachers and citizens, in recent years there have been grave questionings of its worth and some outspoken opponents have raised their voices. This criticism comes at a time when the United States is far in the lead of other nations in athletics.

Some Criticisms.
"Thus while Europe sits at our feet to learn the A B C's of athletics, the system, both in high schools and universities, has its critics. What are the criticisms? Let us sum up some of the graver ones: 1. That the chief end to be gained by competition is to win games, no thought being given as to whether or not the sport is good for the boy.

THE FIGHT AGAINST CHINCH BUG PEST

COUNTY ORGANIZATION IN INFESTED DISTRICT WILL BRING
BEST RESULTS.

United Action Will Mean Road Oil at Lower Cost and Best Freight Rates—Important To Prevent Escape of Bugs From Wheat Fields.

(By S. A. Forbes, State Entomologist, University of Illinois.)

Last week's article stated there were 22 counties in the state that will be more or less heavily infested with chinch bugs this year.

Mode of Organization.

The organization of infested districts can best proceed by counties, and the agencies whose cooperation is essential in the beginning are the business men's organizations at the county seat, the county officers of the farmers' institute, and the local papers of the county. As soon as the fact is evident that widespread injury to wheat and corn is impending in any county, a conference should be promptly called of the editors, farmers' institute officers, and officers of the commercial club or other business organization, and measures should be taken for mass meeting to be held at the larger town, and addressed by a representative of the entomologist's office, who will discuss the local situation and the measures necessary to be taken.

At this meeting township lieutenants should be appointed, to call and organize for school house meetings, especially in districts where the danger is greatest. At these district meetings practical talks should be made, circulars distributed, questions answered, and everything made ready for the actual harvest made operation against the chinch bug.

At the county seat meeting plans should be reached as to the means of supply of the necessary materials to farmers at the lowest possible cost. Wholesale rates, plus transportation, can usually be arranged for through an agent or

The materials to be poured upon the ground for making the barrier lines are No. 7, road oil as made by the Standard Oil company at its refinery in Whiting, Ind., or crude creosote (containing 8 to 10 per cent of tar acids), or crude carbolic acid, to be obtained from almost any large wholesale dealer in paints or drugs. The No. 7 road oil of the Whiting refinery is a nearly perfect material for this purpose, and it has been longer and more thoroughly tried out than the other substances. It has, however, the disadvantage that it is not on the general market, and must be made in advance for this particular use. Advance arrangements must consequently be made for the amount likely to be needed for the season; and it is difficult to dispose of any surplus remaining. The creosote and carbolic acid, on the other hand, are common market products, much used for other purposes, and can be had in any quantity by giving previous notice to insure a sufficient supply within reach at the time.

The cost of the road oil necessary to maintain a mile of the barrier for an average season with be \$9 this year, and that of the creosote will be \$13. If we take into account the labor of the farmer and his team in the preparation of the ground for the road oil or the creosote, respectively, we must add \$23 or \$27 a mile for the road oil and \$15 for the creosote or carbolic acid. The total cost, on this basis, will be \$32 a mile for the road oil treatment, and \$28 a mile for that with creosote.

The most difficult part of the field operation is the preparation of a path along the border of the infested field upon which to pour the materials for barrier line. For the creosote it is only necessary that a bare and fairly level surface, reasonably firm, should be made ready; but for the road oil a hard smooth surface is much more essential. The latter must be kept so sticky that the bugs cannot cross it, and consequently must not be permitted to sink into the ground. The creosote acts by its offensive odor, such that the bugs will not cross it even though they might do so if they would, and these odors are given off from the saturated oil after the fluid has soaked into the ground.

No single method of preparing the line will answer in all places and under all conditions, and much must be left to the experience and judgment of the farmer himself.

For full information, write for Circular to S. A. Forbes, Urbana, Illinois.

PIGS NEED MIXED DIET FOR BRINGING BEST RESULTS

Feed Without Change Often Brings About a Dullness, Lack of Appetite and Indigestion—Treatment is Suggested.

(By Doctor D. McIntosh, Professor of Veterinary Science, University of Illinois.)

The pig, like other animals, suffers at times from derangement of the stomach. If fed for a long time on one kind of food it is likely to be affected with indigestion, causing loss of appetite, dullness and loss of flesh, and this condition is favorable for the development of worms or ulceration of the stomach. It is therefore necessary in order to keep the pig in good health, to give it a mixed diet, or complete change of food for a few days. There are a number of diseases in other parts of the body which are caused by a faulty digestion such as diarrhoea, vomiting, lung and skin diseases, and a number of others.

Symptoms of Indigestion.

The appetite is usually more or less impaired and sometimes wanting altogether and in other cases again, there is a morbid craving for stuff that the animal would not touch in health; it will come up to the trough, take a few mouthfuls, then leave off; in some cases it will press its nose against the ground and may vomit or squeal; sometimes it will vomit up a sour smelling liquid mixed with a little half masticated food; the bowels may be constipated or there may be diarrhoea; in chronic cases there is often a cough and the pig may suffer from headache; or it may stagger from giddiness and even fall over; in young pigs indigestion causes fits. Animals in this condition will not thrive or grow, but usually loses flesh and sometimes becomes emaciated with wasted muscles and shrunken abdomen. The pulse in some cases is quite natural, in others it is somewhat increased in frequency or is irregular; there may also be fever and scanty, high colored urine.

The cause of indigestion in the pig are want of exercise and too much food, or food of a poor quality; hence it results in weakening the stomach. To prevent this the pig should be allowed to run at large in a field; especially in this case in the young pig, as it requires more exercise than the adult. It is best to let the pig run on pasture where it can dig and root in the earth. In doing this it gets roots of plants which are the natural food of the pig. It should be fed regularly on nutritious food and not too much of it.

Treatment.

If the pig is constipated give one ounce of Epsom salt and a teaspoonful of ginger dissolved in half a pint of water at one dose. If there is diarrhoea give two tablespoonfuls of castor oil or a tablespoonful of tincture of rhubarb. After the physic has operated give a teaspoonful each of tincture of ginger and gentian at a dose three times a day; or of the

FARMING METHODS IN SOUTH AFRICA

CLIMATE CONDITIONS VARY
GREATLY IN FIVE PROVINCES.

Irrigation and Dry Farming Find Favor in the Semi-Arid Regions—Corns, Nuts and Fruit are Accounted the Principal Products.

(By William A. K. Morkel, Boer Agricultural Student, from South Africa.)

South Africa is divided into five distinct states or provinces, namely: The Transvaal, The Orange Free State, Natal, Cape Province and Rhodesia, all of which excepting the last mentioned go to form what is known as the Union of South Africa.

The climate varies considerably throughout these several provinces, those lying further north, such as the Transvaal, Orange Free State and Natal being decidedly more tropical than the eastern and western provinces which constitute the whole of the extreme southern region—a pretty extensive area, which is about twelve or fifteen times the size of the state of Illinois. The annual precipitation over the entire country varies proportionately, the further from the equator and along the coast, such as Cape Town, Port Elizabeth, East London, etc., having a greater rainfall (about 25-35 inches usual annual precipitation) than the less fortunate areas of the interior, which are subject to periodic droughts. Curiously enough around the coast of Cape Province and throughout the Western Province the rainy season differs from that of the Transvaal, Natal and Orange Free State. The rainfall of the Western Province oc-

BEST EXERCISES BEGET SELF-FORGETFULNESS

Health and Grace Come Only With This Unconsciousness of Self—Exercise From Games Better Than That Seriously Planned.

(By Gertrude E. Moulton, Director of Physical Training for Women, University of Illinois.)

Health and grace demand unconsciousness of self. They demand something of interest to which we can turn and forget ourselves. For this reason they are best found by not seeking them directly. More real health is gained from five minutes in some active enjoyable game than from an hour's exercise in your own room with your mind centered on self. Studying poses before a mirror will never develop grace as will playing games or doing gymnastic dances which use all the muscles of the feet, the back, the waist and the whole body, and so fill your mind with the feeling of freedom and rhythm that there is no opportunity to think of self or the effect you are making upon others.

We work better when our thoughts are objective rather than subjective, when we are more interested in something outside of self to be accomplished than in the method of accomplishing it, or the effect we are making upon others. "The centipede was happy quite until the frog for fun asked, 'Pray, which leg comes after which?' Which wrought his mind to such a pitch he lay, distracted in the ditch considering how to run."

Must Forget Self.

We were made for action. Muscular activity and life are almost synonymous. Before all of one's muscles were paralyzed death would occur. In order to have vigorous life (or vigorous muscle) we must act without stopping to consider the exact effect of each action on health, and

CORN SILAGE FOR SUMMER FEEDING

IN SOME CASES PROVES MORE
VALUABLE THAN PASTURE.

Steers Showed Finer Quality With Silage Than Grass—Figures Were Satisfactory Too With Cows Fed In Lots.

(By W. H. Smith, University of Illinois, in Ohio Farmer.)

The department of animal husbandry of the University of Illinois began a series of experiments during the pasture season of 1912 to determine the value of corn silage for summer feeding. The first trial involved the use of 68 head of cattle, 20 of which were fattening steers and the remainder were specimens of cows with calves and two year old heifers from the university breeding herd.

The steers used in this experiment were only of medium grade, but were as good as could be bought on the Chicago market at the time. They were carefully sorted into two lots of 10 head each and placed on feed May 18, 1912. Each lot was fed a full feed of shelled corn and cottonseed meal in the ratio of four to one. In addition, one lot received corn silage; the other had the run of an eight acre blue grass pasture. The silage cattle were fed in a paved lot 36 by 48 feet, with a 12 foot shed along the north side. The steers on pasture were provided with a small shed open on all sides. The summer proved to be extremely hot, which noticeably affected the steers fed in the paved lot. This could have been overcome easily had a lot been available out in the open, away from buildings and provided with shade.

Silage Surpasses Grass.

Silage Pasture	
Initial weight per steer (lb.)	945
Initial value per cwt.	\$7.50
Final value per cwt.	\$8.50
Average daily gain (lb.)	2.15
Shelled corn	13.88
Cottonseed meal	3.42
Corn silage	20.93

Tot. cost of feeds	\$316.91	\$332.10
Marketing expense	28.50	28.55
Value of pork produced at \$7.50	43.95	69.00
Final val. per lot	1908.95	997.66
Profit per steer (with pork)	3.27	2.82

This table is a summary of the results of the experimental based upon the following market prices of feeds: Corn, 50c per bushel; cottonseed meal, \$30 per ton; corn silage, \$3.27 per ton; blue grass pasture, \$1.10 per acre for the season. This price for pasture is considered conservative in this section of the state. The value of the silage was obtained by combining the value of the corn and the stalks it contained and the cost of putting it up.

Figures in table I show a slightly greater average daily gain for the pasture lot, as compared with the lot fed on silage. The silage fed steers, on the other hand, put on a better finish and sold for 20 cents more on the market than the pasture lot. It should be observed that the amount of pork produced was considerably greater for the pasture lot than the dry lot. This, of course, is to be expected where the hogs following steers are fed no grain. As is sometimes the case, the production of pork saved these steers from being fed at a loss. This is largely accounted for from the fact that these steers were only of medium grade and struck a very dull market; in fact, they had to be held over and sold the second day.

Other Comparative Figures.

In case of the breeding cows and heifers a comparison was made between bluegrass pasture and corn silage supplemented with oil meal for a summer maintenance ration. One lot of cows nursing calves, and one lot of two-year old heifers were fed in a paved lot, while two similar lots were placed on bluegrass pasture. All the animals were in very high condition at the beginning of the summer, which required the feeding of considerable amounts of silage to maintain. This necessitated a slightly greater cost for summering the cows fed silage in the dry lot than those on pasture. In the case of the two-year old heifers, those fed in dry lot on silage made a slight gain in weight during the summer, while the pasture lot lost a small amount. Since these animals were kept in much higher condition than could be economically practiced on the ordinary farm, a summary is not presented.

It is sufficient to say that the cows in dry lot, fed through the summer successfully in just as good condition as the cows on pasture with a much cheaper outfit of equipment. Note should be taken that in the above experiment with both the fattening and maintenance ration, corn silage was supplemented with a highly nitrogenous concentrate. This is necessary because corn silage, like the corn itself, is deficient in protein and should be properly balanced to secure the best results. Whether oil meal is better than cottonseed meal to finish this protein is a matter on which practical feeders disagree. Either is good. A large number, however, prefer the cottonseed meal when they are feeding large amounts of silage as it is less laxative and is usually a trifle cheaper than oil meal.

AT INTERSCHOLASTIC TIME, May 14-16, University of Illinois.
This year the May Day dance tells the story of "Illinois spirit" attempting to show to a discouraged and pessimistic "mere mortal" the beauty in the common things of every day. At last the "mere mortal" catches the spirit, throws off her somber robe and in radiant attire joins in a joyful, graceful dance.

curs between the months of March and September—that is during the winter, while the rainfall for the other states is spread over the summer months—October to March, and generally occurs in the form of periodic storms, when as much as one to one and a half inches fall within an hour. The droughts usually spread over a period of six months or so, but occasionally go into years, when its severity has meant a distinct set back not only to agriculture, but also to commerce as a whole. It has been mainly due to this scarcity of water over western regions, also to the uncertainty of the rainfall over quite a number of areas, where ordinarily the precipitation is sufficient for carrying on successful agriculture, that the progress of farming generally has been sorely handicapped; but happily within recent years we have been able by means of modern methods of scientific agriculture to harness our great natural resources and even now the annual production compares very favorably in value with that of the gold mines, whose output of gold is the largest in the world.

Dry Farming.
Irrigation and dry farming are making rapid strides in these semi-arid regions, with the result that

(Continued on Page Twelve)

animal will take a little food, give ten grains of sulphate of iron and a teaspoonful of ground anise at a dose in the food twice a day. If the animal is troubled with vomiting, give two drops of the wine of ipecac or five drops of carbolic acid in a little sweetened water will be found useful; ten drops of nitro-muriatic acid in a little water given twice a day is also good.

All the above mentioned quantities of medicines are for pigs six months old and upward and half the quantities for pigs three months old.

AGGREGATION OF COACHES, UNIVERSITY OF ILLINOIS.
The men who will give courses in Athletics: Coaching and Training Teachers. Summer session, June 22 to August 14, 1914. From left to right: Director George Huff, (Baseball); Harry Gill, (Track); Robert Buppke, (Football); Ralph Jones, (Basketball).

ber that we are dealing with the

young and the immature and that their viewpoint, not ours, must largely govern. The young must have some time to do the things they like to do and enjoy doing, as long as no harm results and it is our duty to guide and direct their activities into the right channels. If we enter into their activities wholeheartedly, with a genuine spirit, this guidance and direction will be successful.

"No one realizes more than I do that athletics should be but an incident in high school or university life and all other outside activities may be put in the same category. Music is an admirable study, but to neglect one's education for its pursuit would be a grave mistake. So with dramatics, social life, debating, oratory, newspaper work and athletics—all are of value and admirable as a supplement to the real work of the school, unless they are permitted to usurp too large a place. Students who can participate in these outside activities and at the same time maintain a high standard in the classroom should be encouraged—they are being rounded out and in many of these activities they are being fitted to make good citizens and leaders in after life.

"The modern system of highly specialized athletics in schools has been of comparatively recent origin. While at the beginning of the era of athletics, the system had generally, I think, the hearty endorsement of teachers and citizens, in recent years there have been grave questionings of its worth and some outspoken opponents have raised their voices. This criticism comes at a time when the United States is far in the lead of other nations in athletics.

Some Criticisms.
"Thus while Europe sits at our feet to learn the A B C's of athletics, the system, both in high schools and universities, has its critics. What are the criticisms? Let us sum up some of the graver ones: 1. That the chief end to be gained by competition is to win games, no thought being given as to whether or not the sport is good for the boy.

"The desire to win, when the game

is conducted fairly and fully within the rules, is not objectionable. The point to be insisted upon is that the victory must be won with absolute honesty. 'Fighters' in every walk of life are successful—those strongly imbued with the desire to win and occupy the seats of the mighty. When he helps to win a game, a boy may be given his first inspiration to do something better than others do it. I am certain that almost all of our games make for physical betterment. There are a few sports—rather events in some branches of sport—concerning which there may be some honest doubt. For instance, no one will declare that baseball is anything but helpful in every way; a sport such as long distance running may cause different opinions.

"It is charged that those who need the training the most, get the least and that those who need the least receive the most attention. To provide rational training evenly for all students rather than elaborately to train a few, would certainly be the happiest solution of the problem. If we could order every student to the gymnasium to take his rational training and each student would obey willingly and gladly, this dream might come true. But physical training work, more than any other kind, to obtain real results, must be done cheerfully, enthusiastically. Ordinarily gymnastic work is monotonous. A boy must exercise with a will and zest. He wants fun with his exercise and that is best provided by the playing of some game.

The obvious step then, is to provide games for all; games for the weak and games for the strong. If physical limitations bar one from football, let him play tennis. If a lack of skill forbids baseball, let him try swimming or skating. There are games suited to all physiques and temperaments. The difficulty, as I have seen it, is not in inducing boys to take part in some game to which they are adapted, but to provide adequate facilities. The utmost should be done to develop intramural athletics, to encourage class competition and all kinds of local competition. The regular team, which is 'elaborately trained' and engages in outside competition, furnishes an important inspiration to the other students by 'popularizing' a branch of sport."

KERNELS FROM KORN BELT (Sol E. Quizzer.)

Even a cabbage can't grow a head worth having unless it is well fed.

Some folks that don't believe in luck seem to believe in potluck—I saw Mrs. Hammer catchin' the neighbor's hen yesterday.

WORLD'S LATEST FINANCIAL AND MARKET NEWS

TRADERS CAUTIOUS ON STOCK MARKET

EXCHANGE RESTS—NOTHING TO
STIMULATE SPECULATION.

Statistics of Foreign Trade Make a
Bad Enough Showing to Repress
Any Tendency Toward Bullishness
Small Trading is Done and Fluct-
uations Are Narrow.

New York, May 15.—The stock
market rested today. There was
nothing to stimulate speculation.
Traders moved cautiously.
Trading fell to small proportions
and fluctuations were narrow. In
the first hour there was a fractional
improvement with a good demand for
steel, Reading and some other popu-
lar shares, but in the last hour the
effect of realizing more apparent and
small gains were cancelled.
Statistics of foreign trade made
a showing bad enough to repress any
tendency toward bullishness. Do-
mestic exports for April amounted in
value to \$58,286,000 as compared
with \$75,500,000 last year. Equally
significant were the figures of mer-
chandise exports and imports at New
York for April. Imports increased
\$11,000,000, while exports decreased
about the same amount.

Baltimore and Ohio issue of \$35,-
000,000 year 4 1/2 per cent notes
was oversubscribed in a few hours.
The street had expected a bond issue
but President Willard said it had
been decided to make a short term
loan on account of plans for issuing
a blanket mortgage.

New York Stock List—Last Sale.

GREAT PROJECT OF FIFTY YEARS AGO

WAS CONNECTION OF TWO CONTINENTS BY LAND TELEGRAPH

Plan as Proposed was to Connect New York and London By Way of Bering Strait—Was One of the Most Gigantic Projects Ever Considered By Men.

Washington, May 15.—Fifty years ago this summer interest in the great project of connecting the American and European continents by land telegraph was at its height and the consummation of the undertaking was regarded as practically assured. The plan was to connect New York and London by way of the Bering Strait.

Although the first ocean cable was laid in 1857, there existed much skepticism regarding it and as late as 1865 it was declared by many to be of no practical use. The enormous labor and cost of laying an ocean cable and the unsatisfactory manner of the working of those first laid gave rise to the opinion that failure would be the ultimate outcome.

Perceiving the wide demand for telegraphic communication between the two continents, Perry Macdonald Collins, an American engineer of note, conceived the idea of an overland route. The plan was for a private company, backed by the United States government, to build a line north from San Francisco, through British Columbia and Alaska, to a point on Bering Strait nearest Siberian land. Simultaneously, the Russian government was to build from St. Petersburg across Siberia to a point opposite the American terminal on Bering Strait.

Just how the wires were to be carried across the thirty or forty miles of water separating the two continents was never fully worked out, but a series of floating buoys, or small ships, firmly anchored, was thought to offer a solution of the problem.

The enterprise advanced in due time to the point where representatives were sent to St. Petersburg to lay the plan before the Russian government. Success attended the mission to the extent of a tentative agreement whereby the czar was to order the construction of the Siberian line whenever its practicability was demonstrated by the American promoters. Full permission was granted for an American engineering party to explore Eastern Russia and the great Siberian wilds for the purpose of locating a route and testing the feasibility of maintaining telegraph lines in that region.

Numerous surveys were made through British Columbia and Alaska and a route was practically decided upon. Nearly all of the way it led through an uninhabited country, remote from sources of supply, and into a vast region locked in ice and snow during seven months of the year. Throughout this region, it was proposed to maintain relay stations at frequent points, where operators and linemen would always be on duty.

From 1863 to 1865 many parties and expeditions were organized and sent out to explore and demonstrate George Kennan, afterwards well known in the United States as a traveler and lecturer, joined one of the expeditions, when only 18 years of age, and spent over two years in Siberia, building and operating experimental lines. Kennan was an expert telegrapher, and his mission was to prove to the satisfaction of governments and capitalists that telegraphic communication could be maintained constantly in the semipolar regions.

In Siberia, the Kennan expedition traveled thousands of miles by dog sledge and on horseback, investigating climatic conditions and making surveys. The report to the czar and to the American promoters was that the project was entirely feasible. It is said that the Trans-Siberian railway subsequently followed much of the lines marked out by the Americans.

It was while engaged in making further surveys, believing fully that the American end of the line was already under construction, that a message, by courier from St. Petersburg, reached Kennan informing him that the enterprise had been abandoned and ordering the expedition to return to the United States for discharge.

The successful laying and operation of the second Atlantic cable in 1865 blasted the hopes of the promoters of the American-Siberian line. Governments and capitalists looked coldly upon the great outlay necessary and refused to finance further experiments. Thus, all of the expeditions were recalled and the promoting company dissolved. The irony of fate made it possible for Kennan, when he finally reached London, to send a message by cable to friends in America.

Viewed from the standpoint of 50 years ago, the project was one of the most gigantic ever considered by man. Today, the undertaking is virtually accomplished, the only remaining link being the bridging of Bering Strait.

Splendid for Rheumatism.
"I think Chamberlain's Liniment is just splendid for rheumatism," writes Mrs. Dunburgh, Eldridge, N. Y. "It has been used by myself and other members of my family time and again during the past six years and has always given the best of satisfaction." The quick relief from pain which Chamberlain's Liniment affords is alone worth many times its cost. For sale by all dealers.—adv.

Don't meddle with the electric wiring. If you want it changed, consult an electrician.

SHIRRED SATIN CROWN FOR AFTERNOON HAT OF FANCY BLUE STRAW.

The attractive demi-dress hat of blue here illustrated has a brim of fancy straw, with a crown of satin, which is gathered on heavy cord. A fancy feather tip is applied to the brim of the hat where it is tilted up on the left side.

SOME ELECTRIC DON'TS.

Don't fail to replace cracked insulators, broken switches and worn out lamp sockets.

Don't hang clothing, or anything else, on the electric light wires, or lamp cords, in the home.

Don't attempt to improve the electric wiring in the house unless you are an electrician.

Don't run electric motors and fans without proper oiling.

Don't attempt to adjust electric lamps with the current on.

Don't use screw drivers, pliers and other iron or steel tools about electric lamp sockets without opening the master switch in the attic.

Don't handle electric meters roughly.

Don't fail to treat every loose electric wire as though it were live. Handle it with care. You can't tell by looking at a wire whether it is alive or not.

Don't touch dangling wires in the street. Even broken telephone wires are dangerous, as they may be lying across a live electric trolley wire.

Don't be too familiar with strange overhead wires, even with a kite string.

Don't replace burned fuses with bits of wire. The fuse is designed to protect you as well as the circuit. Don't forget that 500 volts, or less, is sometimes fatal.

Don't touch the electric lamps while standing in a bath tub of water.

Don't attempt to put in new sockets, new switches, buzzers, etc., without turning off the current.

NEW BOOKS AT THE

PUBLIC LIBRARY.

The following new books have been cataloged at the Public Library and will go into circulation to-day, May 16, at one o'clock.

Drama and Poetry:—Augier, Emile—Giboyer's son; Lindsay, N. V.—General William Booth and other poems; The Literary Digest says in speaking of the Illinois poet's lines in General Booth: "Mr. Lindsay always writes with sincerity and vigor. In these lines he shows an enthusiasm which redeems even the most startling expressions from the suspicion of irreverence." Shakespeare, William—The new variorum edition of Julius Caesar; Taylor, B. L.—Mortley measures.

Useful Arts.—Fleischer's knitting and crocheting manual; Harvey, L. M.—Priscilla Irish crochet book; Dettich, L. B.—Priscilla wool crocheting book; Kelly, A. A.—Exquisite hanger; Keys, Gwen—Priscilla knitting book; Mahaffy, M. Y.—Priscilla drawn work book; Miller, Wilhelm—The "Illinois way" of beautifying the farm. A most attractive pamphlet published by the Department of Horticulture, University of Illinois. There are over a hundred good illustrations in the book.

Fiction.—Galsworthy, John—A motley; Morgan, William de—When ghost meets ghost.

For the Rent Collection.—Chamberlain, G. A.—Home; Conrad—Chance; Vorse—Heart's country.

Whooping Cough—A Safe and Reliable Remedy.

"When my children had whooping cough a few years ago the only medicine I gave them was Chamberlain's Cough Remedy," writes Mrs. D. O. Vernon, Burrows, Ind. "It never failed to relieve their coughing spell. It kept their coughs loose. The children liked it better than any other cough medicine, and I know it is safe and reliable." For sale by all dealers.—adv.

NEW FORESTRY

SCHOOL DEDICATED.

Ithaca, N. Y., May 15.—Many leaders in the national movement for the conservation of the forests came to Ithaca today to assist in the exercises in dedication of the new forestry building of the Cornell College of Agriculture. The programme has been arranged to cover two days and has as its leading feature a conference on forestry problems and the conservation movement. Prominent among the participants are Henry S. Graves, chief of the United States Forestry Service; President Drinker of Lehigh University, and Dean Liberty Hyde Bailey, former director of the Cornell College of Agriculture.

FARMING METHODS

IN SOUTH AFRICA

(Continued from Page 10.)

The price of land is going up by leaps and bounds and farmers as a whole are fast realizing the splendid possibilities of the soil, when sufficient water is supplied. Hundreds of dams are being constructed all over the country, bore holes are fast being sunk and more frequent and extensive cultivation is resorted to than heretofore, with the result that farmers already are reaping the benefit not only of bumper yields, but also of a rapid increase in value of their land, which is anywhere between \$200 and \$300 and infinitely more in districts like that of Oudtshoorn. Rhodesia enjoys the unique privilege of having its rainfall spread evenly over the entire year, the total annual fall being from 222 to 29 inches, while the climate is extremely uniform in character. The soil is wonderfully rich, both agriculturally and minerally and all that it requires is an energetic, methodical colony of farmers to show what it is capable of producing. Ranching is carried on pretty extensively and quite recently the chartered company has entered upon a gigantic ranching scheme over some hundreds of thousands of acres and have been busy for the past six months or more in importing suitable cattle, such as Short-horns, Devons, etc., which will eventually cross with the hardy native breeds.

They produce, among other things a considerable quantity of Rhodesian tobacco, corn, monkey nuts and fruit—mostly citrus. As we go further south we find that the soil of the inland portions of the provinces is somewhat of a calcareous nature, varying from sandy to clayey and being especially rich in lime, phosphorus and potash, although lacking somewhat in nitrogen and humus. Along the coast and throughout the western province, the soil is extremely fertile, mostly of a dark rich color and is the most intensively cultivated land in South Africa.

REAL SOIL BUILDING CANNOT BE DONE BY LEAP AND BOUNDS

Soil Must Be Studied and Then the Particular Deficiencies Met—B. F. Harris Points To Needs In This Regard—Farm Boy Needs Pleasurable Exercise.

Many farmers of the state are familiar with Doctor C. G. Hopkins' Circular (165) on "Shall we use 'Complete' Fertilizers in the Corn Belt?"

In accord with Doctor Hopkins' views is a very interesting article by Mr. B. F. Harris in the May number of the Banker-Farmer.

In a leader to his article Mr. Harris says: "While we all know the soil must be fed and production built up, this is not to be accomplished by dumping in concentrated and costly fertilizers in the belief that it can thus be done by leaps and bounds. Slowly and gradually must the work proceed to secure permanent results."

The whole article should be read by all who know much of the "Truth About Fertilizers." We quote the first paragraph:

"Basic planks in the better farming side of the Banker-Farmer platform are those dealing with 'soil survey' and the 'truth about fertilizers.' We must know what elements our particular soil contains and in what proportions; for what

kinds of crops it is fitted with or without additional plant or soil foods, and how to maintain its fertility by utilizing what elements we already have and by supplying any actual deficiencies. In Europe the use of chemical and other fertilizing elements is common farm practice and they total an enormous sum. In the United States the use of fertilizers is rapidly growing along the Atlantic seaboard states for high priced truck crops and cotton, and the fertilizer agent and his company's advertising literature now are spreading throughout the nation. Feeding the soil is the last word to the farmer, and now must be considered seriously in the great agricultural sections of the country. The middle and western sections hitherto have given the commercial fertilizer question small consideration. In most instances they have regarded fertility as inexhaustible or, in any case, felt that the use of clover or legume, or finally a systematic crop rotation would replenish lost productivity. All now realize a declining fertility, yet few appreciate the fact that even the best practical rotations with legumes will not achieve the desired results.

Physical Exercise.

People in the country on the farms do not suffer usually from lack of exercise. There is an element, however, in exercise that is extremely important, viz., pleasure or play—and this unfortunately is something that many parents forget. The boy on the farm needs an occasional half day for a ball game and the girl on occasional party or picnic.

We call the attention of readers of the "Corn Belter" to the articles by Director George Huff and Director Gertrude Moulton, on this important subject in the present issue. They have had years of experience with

the young people of the state of Illinois and what they say deserves your careful consideration.

Attention of teachers and parents is called, to, to the new courses offered this summer at the University of Illinois in coaching, coaches and training teachers of the high schools how to handle and train athletic teams and how to manage and direct athletic affairs in the schools of the state.

FARMERS TO CO-OPERATE.

Emporia, Kas., May 15.—If plans discussed at a conference held here today are successfully carried out, the great crops in prospect for Kansas this year will be handled by the farmers and sold direct to the consumers, with the middlemen eliminated from the transactions. The movement to eliminate the middleman is said to be a direct result of the action of the commission firms in Kansas City, and other market centres in demanding higher commissions. The movement for a farmers' co-operative society has been stimulated by the success of a similar movement organized some time ago by the Lyon County farmers, who marketed their hay crop directly to the consumers and by saving commissions received a higher price for their product without its costing the consumer any more. It is calculated by the promoters of the movement that all products of the farm can be handled in the same way and with equal success. Today's conference to discuss organization was attended by representative farmers from all over this section of the state and by officials of the Kansas Grange, the Farmers' Union and other organizations devoted to the interests of those engaged in agriculture.

PERSONAL TAX NOTICE.
All personal tax is past due and must be paid at once to avoid considerable trouble and extra expense.

THE ILLINOIS STOCK EXCHANGE

13 West Side Square, Jacksonville, Ill.

The Ayers Safe Deposit Vault

A Safe Deposit Box is not a luxury, but a necessity to the owner of stocks, bonds, deeds, mortgages, insurance policies and other valuable papers.

Anxiety about jewelry and silverware not in use is dispelled when they are in a Safe Deposit Vault.

It may be of interest to know that in the construction of the vaults are more than 380,000 pounds of steel and the door itself weighs tons.

To rent a Safe Deposit Box in this vault costs less than one cent a day.

Private rooms for the examination of papers are provided for the convenience of patrons.

TELLS HOW WEATHER FORECASTS ARE MADE IN UNITED STATES

Department of Agriculture Tells How Predictions Are Based on Information Received by Wire From Varying Points.

The last issue of the Weekly News Letter sent by the department of Agriculture to weather observers and crop correspondents through the country gives the following explanation of how weather forecasts are made. George H. Hall of Alexandria has called attention to this article, which answers a question often asked:

One of our correspondents writes: Will you please tell me through the News Letter, in simple language, how the weather forecasts are made?

To this the shortest and simplest answer is: By telegraph. The weather forecaster does not look out of the window and guess. He is not weatherwise like the old salt who scans the approach of a storm without knowing how. To the signs by which the ordinary citizen decides whether to take his umbrella with him or leave it at home, he pays no attention. Give him his telegraph wires and he can make his predictions as accurately in a windowless cellar as on the top of New York's highest skyscraper.

The private individual sees the clouds settle on a near by mountain or the rain sweep over a field a mile from his house and knows that the storm will be on him in a few minutes. With the aid of the telegraph the weather man sees the same storm when it is a thousand miles away, and not only this storm but every other one in the country. He knows in what direction and at what speed each is moving, and can thus calculate with reasonable accuracy the approximate time when it will reach any place in its route.

Twice a day, at 8 in the morning and 8 in the evening, reports are telegraphed to Washington from about 200 observers stationed in as many localities in the United States and Canada. In these reports the observers do not volunteer their personal opinions about what is going to happen. They confine themselves to a plain statement of the actual conditions at that particular moment, the pressure, or weight, of the atmosphere, the temperature, the direction and velocity of the wind, the amount of rain since the last report, and so forth. From this information the weather map of the United States is made up, showing the conditions that prevail in every part of the country. Since there are two maps for each day it is obvious that by comparing them the forecaster can keep track of the course and progress of both storms and periods of clear weather. From that, the next step is to predict what sort of weather will prevail for a day or two in any given locality.

This map is the basis for all scientific weather forecasting. A glance at it will show that it is divided into "high pressure areas" and "low pressure areas." These are technical terms used to describe the regions in which the weight or pressure of the atmosphere is great (high) or small (low). At sea level the barometer, which is used to measure this weight, will register 30 inches under normal conditions of the atmosphere. When it registers more than this, say 30.5 or 31, the pressure is "high;" when 29.5 or less, "low." In this way the height of a column of mercury in a barometer indicates the weight of the air just as, in a thermometer, it indicates the temperature.

Low pressure usually means strong winds, rain, and rising temperature; high pressures, clear, cool weather. For a reason to be explained later, these "highs" and "lows," as they are called, travel in a general direction from west to east. The forecaster notes their progress on the map, perceives their speed and the route, and then predicts the time of their arrival at any specified point. If they traveled, like a ship steered by a compass, an exact course to the east and if they moved invariably at the same speed, then weather forecasting would be a simple sum in arithmetic, like calculating the time when a railroad train running 50 miles an hour will arrive at a station 500 miles away. But storms are not railroad trains. They travel in an easterly direction, but they do not travel due east.

Their speed is liable to change and they are affected by the presence of other storms, by mountain ranges, large bodies of water, and many other things which make weather forecasting a complicated science that is. The skeleton of the science, however, is the progress of those "highs" and "lows" eastward across the country.

This progress is caused by the shape of the earth and the well-known fact that hot air rises. The tropical sun in the regions along the equator heats great masses of air, which rise and drift toward the north and south poles. As the earth revolves from west to east these masses are carried along with it at the same speed. But, as is also well known, the equator revolves much faster than the poles, which are practically stationary, in much the same way as the rim of a wheel revolves faster than the hub. Therefore these masses of air, revolving at the same rate as the equator, begin, as they approach the poles, to move much faster than the earth beneath them. There is thus a constant movement of the atmosphere from west to east, a movement which becomes more marked the nearer one gets to the poles.

This, of course, does not mean that the wind always blows from the west. The great current flows in that direction, but surface conditions cause innumerable eddies which are the winds we feel. Into a low pressure area, for instance, the air rushes from every direction. Thus, if the center of the disturbance is to the west of us, we will have an easterly wind as the air rushes toward this center; when the storm has reached and passed us on its easterly way we will have westerly winds. For this reason it is common to say that west winds mean clear weather.

The air that flows into the low-pressure area obviously must go somewhere. Since it is coming from every point of the compass, the only available place is up. As it rises it cools and contracts. In the process the moisture it contains is condensed and we have rain. That is, we are likely to. It can not be stated too emphatically that there are many things to be considered which may make exceptions to the most fundamental rules.

In regard to temperature, everyone has noticed that rain in winter means warm weather, in summer cool weather. This arises from the fact that heat travels more easily through clear skies than through clouds and moisture. In the daytime heat reaches the earth from the sun; at night leaves the earth to be absorbed in the atmosphere. In summer, therefore, when the days are longer than the nights, the earth is being heated for a greater part of the 24 hours than it is being cooled. In consequence the clearer the weather and the easier it is for heat to travel, the hotter it grows. In winter the reverse is true. The cooling time is longer than the heating, and the clearer it is the colder it grows.

Thus the pressure of the atmosphere is the key to the weather, affecting the three vital questions of rain, temperature and wind. Many things may create an area of low pressure and many things may influence its career when once it has been created. But there are certain general rules based on the principles already outlined. The weather maps tell the forecaster the conditions at the moment, and with this information he is able to predict the conditions for the immediate future from a standpoint very different to that of the amateur observer, however experienced who can form an opinion only from the signs visible to his unaided eye. It may, in fact, be said that no accurate forecasts for more than a few hours in advance are possible unless the prophet is able to study a series of observations covering a wide range of country a few hours after they have been taken. For its weekly forecasts, indeed, the United States Weather bureau has reports not only from this country but from abroad and at sea as well.

PLAYS AND PLAYERS.

Motion pictures are now to be seen in Chicago's big Auditorium. Margaret Mayo's new farce, "Twin Beds," has been brought out in Chicago.

Adele Cheridall, an adopted daughter of Billie Burke, is soon to be seen in musical comedy.

Eugene Walter's newest play, "A Plain Woman," seems to have met with favor in the eyes of the critics.

George Alexander is soon to revive Oscar Wilde's "An Ideal Husband," at his theatre in London.

Anne Caldwell and Ivan Caryll are writing the extravaganza in which Montgomery and Stone are to appear next season.

Miss Eleanor Gates, author of "The Poor Little Rich Girl" has submitted the scenario of her new play to Miss Blanche Bates.

Elaine Hammerstein, daughter of Arthur Hammerstein, is to be featured next fall in a new play entitled "Blackmail."

Mme. Nazimova has gone to Europe to see several plays which she is considering for presentation in America next season.

"The Midnight Girl" has passed its one hundredth performance at the Forty-fourth Street theatre in New York.

E. S. Willard is about to emerge from retirement to act the leading part in the London revival of "The Silver King."

Grant Mitchell has been engaged for a leading part in "The Miracle Man," which George M. Cohan is dramatizing from the novel of that name.

Emmett Corrigan and Alexandra Carlisle are to be the principals in Charles Klein's new play, "The Money Makers," to be produced next fall. George C. Tyler of the Liebler company has leased Daly's theatre in New York for a new production called "Lorenzo, the Magnificent."

C. J. Deppe & Company

REDUCTION SALE OF Coats, Suits and Dresses!

The season's end sale of every Spring Coat, every Spring Suit and every Cloth and Silk Dress. After a successful season's selling, we now propose clearing out what remains at extraordinary reductions.

Beautifully trimmed All Wool Cloth Suits, in all the leading materials.

Priced at \$8.00, \$10.95, \$15.00 and \$23.75

MORTUARY

Beoley.
The funeral of Mrs. Joseph Beoley will be conducted Sunday afternoon at 2:30 o'clock from the Concord M. E. church in charge of Rev. H. J. Floreth. Brief funeral services will be held at 1 o'clock from the family residence.

Mrs. Beoley died Wednesday evening at 10:45 o'clock at the family residence one-half mile south of Arezville. Her maiden name was Mary Spoonman and she was born in Schuyler county Jan. 13, 1823. She was twice married, her first husband being John Blair. The children from this union were: Mrs. Gibson Freer, Jacksonville; Mrs. Minnie Foster, Kansas; Mrs. Ellen Hall and Mrs. Lydia Rubart. Mrs. Hall and Mrs. Rubart are deceased.

From her marriage to Joseph Beoley two children were born, Edgar and Mrs. William Parlier of Arezville.

Tehan.
Michael Tehan, familiarly known by his neighbors and friends as "Pa" Tehan, died at the home of his daughter, Mrs. Elmer Dill, Winchester Friday at noon. His wife preceded him in death about six years ago and since that time he has made his home with his daughters, Mrs. Charles Koyne and Mrs. Elmer Dill. Besides these two

daughters he is survived by a son, Patrick of Springfield, and a daughter, Mrs. Watt of Brownwood, Texas. All the children were at his bedside when death came.
Funeral services will be held Sunday morning at St. Mark's church in Winchester and interment will be made in Calvary cemetery.

RED MEN'S GRAND COUNCIL TO MEET IN SPRINGFIELD

Annual Session of I. O. R. M. Will Open Monday—J. F. Brennan to be Re-elected Grand Keeper of Wampum.

The annual state council of the Independent Order of Red Men will begin sessions in Springfield Monday of the coming week. In accordance with custom however officers and delegates begin gathering two or three days in advance of the opening of the first session. Mayor Davis and City Commissioner Brennan expect to go to Springfield this morning and Mrs. Davis and Mrs. Brennan will follow on a later train. City Clerk Pyatt will also go to Springfield some time during the day and possibly other local Red Men will attend.

Mayor Davis goes as a representative of Delaware Tribe of this city and Mr. Brennan is Grand Keeper of Wampum. He is scheduled for election for the 5th term of this office and will then be eligible to the honor of being a past great sachem. In accordance with the custom most of the state officers will be advanced and by this plan the present great sachem, L. Somers of Westfield will become a grand prophet and will be a representative to the national council of Red Men to be held a few months later. W. E. Stone will be elected Great Sachem and the only announced candidate for the post of great junior sagamore, which puts a man in line to become the chief officer, is A. J. Steidley. When the grand council met in Jacksonville just a year ago Mattoon was a candidate for the council in 1914 but as this honor was given to Springfield it is probable that Mattoon will claim the council for 1915.

A little money goes a long way at Knoles' fine clothing store.

JOY PRAIRIE ELECTRIC COMPANY BUILDING HOUSE

The brickwork was finished Friday for a six room house which is to be built by the Joy Prairie Farmers' Elevator Company. The contract for the building was let some days ago to Val Harling of Arezville, who will have a force of carpenters at work on Tuesday. The house will be occupied by H. A. Furry, superintendent of the elevator. A site for the house, which will be equipped in a modern way, was purchased from L. S. Doane, who owns the farm adjoining the elevator property. Mr. Furry has been in charge of the elevator since the present company came into ownership and he has handled the business in such a way that very satisfactory profits have been shown.

UTILITY TO HAVE STOREROOM ON EAST COURT STREET

The building formerly occupied by E. R. Sieber, the gunsmith, 209 East Court street, owned by G. A. Sieber, has been secured by the Central Illinois Public Service Corporation for a storeroom. They will use it as a depot for electrical supplies, etc., shipping thence to their properties in Barry, White Hall, Mercedosa, and other points, when needed. The utility company considered other locations nearer their offices in the Scott block but decided finally upon the East Court street building by reason of its special fitness to their needs for a general storeroom.

ILLINOI DEGREE TEAM GOES TO BEARDSTOWN

The degree team of Illini Lodge No. 4, I. O. O. F., went to Beardstown Friday and conferred the work for Ark lodge upon ten candidates. Those composing the degree team were F. E. McDougall, Arthur Cobb, Thomas Harber, J. E. Wicha, J. A. Peterson, Samuel Stevens, Fred Thies, C. O. Bayha, Thomas Hughes, F. C. Crowley, H. H. Summers, J. C. Rothwell, Walter Brown, William McCurley, John Deatherage, S. P. Johannsen, H. E. Frye, L. D. Caywood, T. S. Matrin, J. W. Dewey, Mathew Minster and Allan Taylor.

IMPROVEMENTS PROGRESS AT LIGHT COMPANY'S PLANT

Work on Ice Plant is Being Pushed Along Rapidly—Construction is of Substantial Kind—New Store Room Arrangement.

These are very active days at the plant of the Jacksonville Railway & Light Company. Men are still at work in rebuilding the gas making machinery, and it will be some time yet before this extensive task started nearly a year ago is completed. When the finishing touches have been put on the plant will be thoroughly up to date in every detail as a large sum is being expended to make it so. One of the first things Supt. Miser did when he assumed control here was to secure the appropriation for this rebuilding.

The largest force of men however is employed on the new ice plant which is located at the corner of Sandy and Anna streets. Joseph D. Goveia who has the general contract for the building is pushing it toward completion rapidly. The construction work is interesting from the fact that much of the material is used only for such buildings. The walls of the storage room for example will be lined with two thicknesses of cork blocks which will then be plastered over. Floors are underlaid with such materials as are calculated to maintain an even temperature or to exclude all air. The building in the main is finished and the solid concrete foundations for the machinery are all in place.

The carpenters are at work building the cooling tower which will surmount the whole. It is being built of unusually heavy timbers which have been treated with creosote. All of the construction work indicates that the management is expending money freely and will have a thoroughly modern ice making plant. The plan for operation is such that by taking advantage of wastes from the plant proper, the operation costs can be held down in a satisfactory way.

The work is about completed on an addition to the storage quarters which are located on the east side of South Main street just opposite the gas house. A frame building was recently moved to a position in the rear of the one already there and the two joined together give a large amount of storage space for supplies of all kinds and for gas stoves. In a long shed near by are pipes and bulky equipment are stored. The supplies have been separated into convenient bins or boxes and a storekeeper is to be placed in charge of the building and nothing will be issued except by requisition.

There seems to be something doing all the time in the line of improvement at the plant and Supt. Miser's wish is to have all equipment in such shape that the most efficient service can be rendered.

WITH THE SICK.

Mrs. W. J. Wood, who underwent an operation at Passavant hospital a few days ago, is improving and expects to return to her home on South Church street in about ten days.

D. Rees Browning, vice president of the Farmers State Bank & Trust Co. is a patient at Dr. Day's hospital where he will undergo an operation. Mr. Browning has not been well for several months past and the operation was determined on to bring relief.

Miss Josephine Gebert, who has been ill at her home on East College street the past week, is recovering satisfactorily.

HAD SEVERE FALL.

Mrs. Johanna Vieira who has been a guest of Mr. and Mrs. George Ferreira, had the misfortune to fall down a flight of stairs Thursday evening. Although suffering greatly from the shock it was found no bones were broken. She was taken to Passavant hospital. Mrs. Vieira is 94 years of age.

TOO LATE TO CLASSIFY.

CHARLES S. FRENCH ANSWERED FINAL SUMMONS FRIDAY

Death Came Suddenly Although Deceased Had Been Sick For Months—Lived in Morgan County Sixty Three Years.

Charles S. French died Friday morning at 7:00 o'clock at the home of his brother A. L. French, near Chapin. Mr. French had been in poor health for an extended period and but recently returned from the east where he consulted some of the best specialists in New York. Physicians were not of one mind as to his ailment and his condition continued to grow worse until the time of his return to Morgan county when he came as one of the funeral party with the body of his son-in-law, Dr. James J. Sheppard.

While Mr. French realized that his condition was somewhat serious at that time he expected shortly to go to Hot Springs, Ark., and believed that a period of rest there would restore him to practically normal health. However his condition became more serious and for more than two weeks past he has been confined to his bed at the home of his brother. The end came suddenly Friday morning although it was apparent the day previous that his life could not be greatly prolonged.

The deceased was 63 years of age and had spent his entire life in this county. His death occurred on the very farm which was his boyhood home. His parents were Samuel and Martha Fox French and he was born March 25, 1851. Mr. French was first educated in the schools at Chapin and subsequently attended Illinois college and was a member of Sigma Pi society. He was married December 31, 1874 to Miss Adelia A. Anderson, a daughter of Alexander Anderson of the Bethel neighborhood. Three children were born to them, Clarence A. and Laura Frances died some years ago while the family was temporarily residing in Jacksonville. The surviving daughter is Mrs. Rena French Sheppard, whose husband, Dr. J. J. Sheppard died recently.

After completing his education Mr. French engaged in farming and aside from the land inherited from his father, with passing years, acquired large land holdings all in the vicinity of Chapin. With his brother, A. L. French he was largely instrumental in establishing the Chapin State bank and for an extended period was vice-president and a director of that institution. He disposed of his bank holdings there when A. L. French organized the Farmers State Bank and Trust Company of this city, and the deceased at the time of his death was a stockholder and director of the latter bank.

For many years Mr. French was a member of the Chapin Village Board and was several times its president. He was progressive in his farming and business methods and the fact that he made a serious study of live stock and agricultural problems is largely responsible for the success he made in his farming operations.

Those who knew Mr. French well were familiar with these characteristics, which marked him a strong and successful man. He had a keen sense of right and wrong and desired above all else to be absolutely fair in all his transactions and relations with the world at large. When once he had conceived that he considered to be the right course for him to follow, nothing could swerve him from that course and he was wholly fearless in the discharge of anything he esteemed to be his duty. He had the frankness and sincerity which are a part of fearlessness. He believed in, and adhered to that principle "Hew to the line, let the chips fall where they may."

Another marked characteristic of Mr. French was his love for children. This was evidenced in many ways and for many years it was his custom to have a great Christmas tree at his son's home in the north part of Chapin to which every child in that village was invited and each child came with the knowledge in advance that there would be some kindly remembrance on that lighted Christmas tree. In various other ways he manifested his interest in children and in the last year or two he has made many evening trips from Chapin simply to be an onlooker at the Jacksonville play grounds in the first ward. It is known that he intended to provide a play ground, or park at Chapin for the pleasure of children in the village and vicinity and it is possible that he made that provision during his final days.

Mr. French did not hold membership in any orders. He was a regular attendant at services of the Methodist Protestant church in Chapin and long had contributed generously towards its support. For years he had taken an active interest in the work of the anti-saloon league and believed that the movement would prove of great value in enforcing and promoting the ideas of temperance in which he considered were for the betterment of the neighborhood which he lived or in larger way which he took a hearty interest and was ready to give aid both with time and money.

By Mr. French's going, Chapin and Morgan county have lost a valued citizen, one who was every inch a man and who stood ready at all times to defend those principles which he believed sound and worth while. As the end of life drew near he realized that it would not be long until the curtain was rung down for the last time. During those days and hours the same sturdy characteristics which marked his earlier life were evident and he was able to look forward with steady and unflinching eye and unalteringly step across the border line. Mrs. French who has been ill for an extended period is at the home of her daughter in Morgan and will be unable to attend the funeral.

The funeral will be held at the residence of A. L. French, north of Chapin at 12:30 o'clock Sunday. The house service will be in charge of Rev. Frederick J. Baylis, pastor of the M. E. church and it is the intention that Judge Owen P. Thomp-

Initial Presentation of the New Summer '14 Straws
